Educational Services

Virtual Classroom
Virtual training that delivers real time value.

We understand that getting your employees trained can often be a challenge due to budgets, scheduling conflicts, or upcoming project deadlines.

Working alongside Emerson trainers, provide your team full access to software and control systems without having to leave the office. The virtual platform uses a modern high-tech approach, so students can absorb content and engage with peers in a location and time that works best for their schedule.

KEY FEATURES

- **Certified Instructors** delivering curriculum and quality instruction
- **Ability to interact** with instructors and peers during course
- **Content flexibility** as courses can be tailored to suit training needs
