

VIRTUAL INSTRUCTOR-LED TRAINING

Training that combines the convenience of online access with a live classroom experience.

Virtual Instructor-Led Training brings the experts to you.

Effective training is essential to ensure your personnel gets the most out of Emerson™ Rosemount™ products. With Virtual Instructor-Led Training (vILT), your staff will train with the industry experts from the comfort of their own home or office. Designed to ensure student engagement and development, this online learning platform combines the advantages of a live classroom experience with the virtual training benefits of animated content and student-teacher messaging.

Virtual Instructor-Led Training offers students the opportunity to develop skills and knowledge of Rosemount products. These courses will provide your personnel with the expertise they need to enhance process efficiency and productivity. Improve your bottom line with exceptional education enabling your personnel to realize and achieve the full potential of your operations.

Improve knowledge of Rosemount technologies and maximize process performance with Virtual Instructor-Led Training.

Virtual Instructor-Led Training benefits:

- Efficient, convenient and consistent instruction for new personnel
- Creates a solid foundation and sets the stage for future learning
- Comprehensive and effective training minus the travel costs
- Course content flexibility ensures sessions are relevant to your operations

**BE SURE TIME SPENT
IN TRAINING IS TIME
WELL SPENT**

Emerson certified trainers understand your industry, and bring our deep product expertise into the classroom. With ready access to the collective Emerson knowledge and talent pool, your local trainer can provide a precise answer to your most complex questions.

Emerson certified trainers have the following qualifications:

Experienced—with field expertise in each specific Rosemount product

Educated—through rigorous technology coursework and certification processes

Trained—certified on Rosemount products and trained in adult learning techniques

Comprehensive and Convenient Virtual Training.

Accessible and comprehensive training programs designed to enhance skills and maximize process performance.

During a Virtual Instructor-Led Training course, students have direct contact with the instructor and are able to ask and answer questions at any point during the course. The instructor is always in view and able to shift display content between the presentation material and a demonstration camera. This online platform also allows the instructor to continually monitor and assess student participation in order to adjust the lesson plan to the level and knowledge of the class. These features are designed to create a realtime, dynamic classroom experience.

Check out some of our most popular Virtual Instructor-Led Training courses and discover the variety of training modules available. These courses can be purchased individually or as a package. Training courses cover a wide range of processes, including pressure, temperature, level and flow, as well as topics concerning communications and industry best practices.

Virtual Instructor-Led Training (vILT) strategy covers:

- + Technology functionality and performance
- + Hardware fundamentals
- + Basics in technology selection and performance
