#### A word from Boris Gabin

##### Lifecycle Services - an integral part of what we do

Lifecycle Services are a key focus for Emerson. We provide the expertise, technology, and processes to support our customers to operate safely, improve reliability, and optimise plant performance.

Across Australia and New Zealand, we have 100+ factory-trained and qualified service engineers servicing assets across our portfolio of valves, instrumentation, and control systems. Our Lifecycle Services teams are focused on Shutdown Turnaround and Outages (STO), and we work with our customers 12–24 months in advance to manage the time, cost, and quality of STOs.

## Proven Result Story

The client wanted to replace their obsolete legacy Distributed Control System (DCS) with a modern DeltaV DCS, but they had to maintain their production schedule, which had only a two-week shutdown window.

### Article

### Local manufacturing enables quicker deliveries of transmitters

Emerson's Quick Ship and Repair Centre in Melbourne is a purpose-built production and manufacturing facility. It is a replication of the standard factory ordering and supply process with one key difference: all products are locally manufactured, which means they can reach Australian and New Zealand customers quickly.

## Ensure safety and optimise production throughout the lithium value chain

There is a growing desire to develop strong environmental sustainability strategies in the industrial, building, and transport sectors. Because lithium batteries for electric vehicles are critical to decarbonization goals, it is essential to focus on operational improvement, greater energy efficiency, waste and emissions management and capture, low-carbon electrification, and clean fuels.

Of course, to achieve sustainability goals, plant managers must address a number of issues.
