Interactive Plant Environment

ABOUT THE INTERACTIVE PLANT

Expedite the learning curve at the Interactive Plant Environment, where Emerson courses are designed to enhance the learner's training experience on Rosemount™ and Micro Motion™ products by simulating real-life plant situations. This immersive training models plant environments, where we can replicate your most common (and unexpected) process scenarios. Our benign oil and water process offers a breadth of measurement points, enabling contextual training within a hazard-free environment. At the Interactive Plant Environment, we're building process proficiency and know-how that far exceeds basic classroom knowledge.
