

# Wireless Gas Safety

Emerson is dedicated to offering reliable gas detection technologies to safeguard your personnel and property.

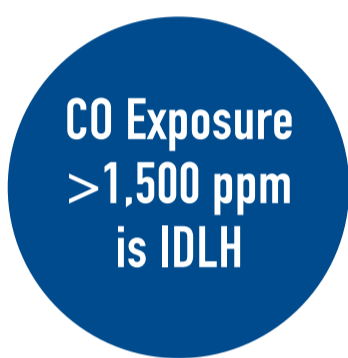

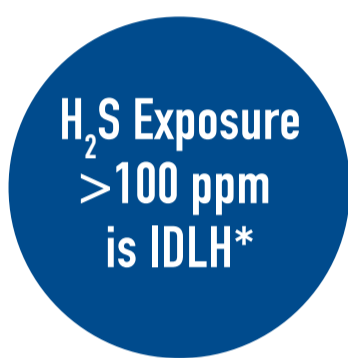

## Toxic Gas Personnel Exposure

The fatality rate from exposure to harmful environments/substances was 8.7% in the oil & gas industry, according to the most recent study.

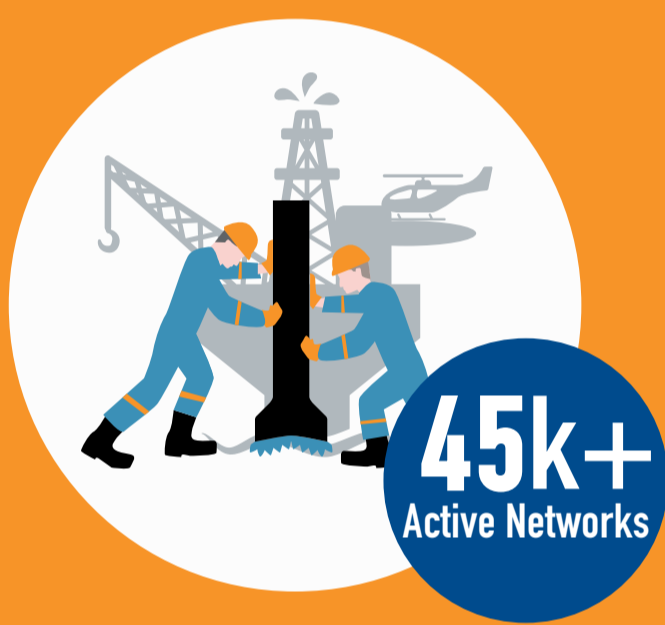

– The Centers for Disease Control

### KNOW THE HAZARDOUS LEVELS

\*Immediately dangerous to life and health

## Early Detection for Remote Locations

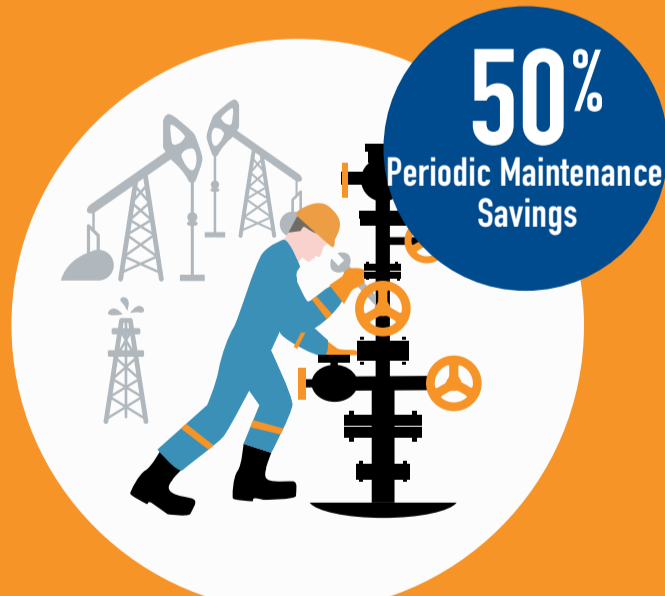

Alert personnel of the presence of gas before they ever step onsite.

## Eliminate Wiring Costs

Deploy devices rapidly and more cost effectively.

\*Compared to wired installation

## Safe, Easy Maintenance

Intrinsically safe, hot swappable sensors and power modules allow you to reduce maintenance time.

## The Rosemount™ 628 Universal Gas Sensor Series

The Rosemount 628 Universal Gas Sensor easily connects to the Rosemount 928 Wireless Gas Monitor enabling reliable, cost effective monitoring of H<sub>2</sub>S, CO and O<sub>2</sub> gas.
