

Micro Motion™ ProcessViz™ Software

Intuitive software data visualization tool, simplifying the most complex diagnostic analysis

Micro Motion™ Coriolis flow meters provide much more than flow measurement data. The Micro Motion 5700 and 4200 transmitters collect process data and run powerful diagnostics continuously, while also collecting data using the historian feature. ProcessViz™ is the standalone software solution that transforms those data sets into a rich, graphical display with a few taps of a button.

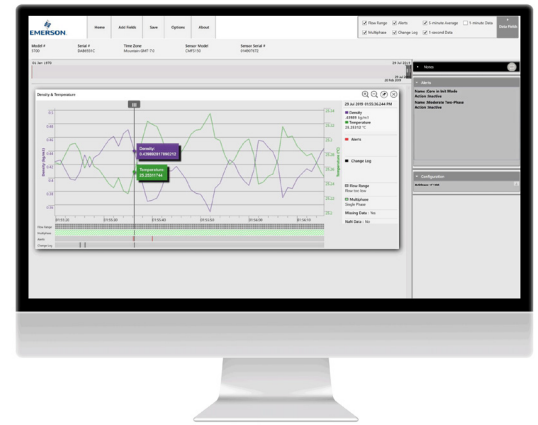

Operators can easily identify process variables and alert conditions from a single screen with detailed historian data from your device; having this valuable information instantly available is essential in expediting the troubleshooting process and crucial in mitigating expensive downtime.

Benefits:

- Intuitive display of process variables and trending to quickly pinpoint and remediate problems before they affect your process and quality of your product
- Extend asset management through browser-based monitoring of all process variables in a user-friendly graphical format
- Isolate and identify process disruptions with our unique data visualization application with your transmitter historian and ProLink™ III Professional data log files, including data from your 4200 2-Wire and 5700 Transmitters
- Export reports to share with colleagues including your notes to aid with system audits
- Incorporates Smart Meter Verification™ Professional or Basic alerts and ProLink™ III Professional data log files

A clear window into your process

Our proprietary software helps operators manage, optimize, and troubleshoot their system process variables efficiently – saving valuable time.

Compatible Software with ProcessViz:

	Historian Data				ProLink III Professional All Products*
	Smart Meter Verification Professional		Smart Meter Verification Basic		
	5700	4200	5700	4200	
Flow Range	●				
Multiphase	●				
Alerts	●	●	●	●	
Change Logs	●	●	●	●	
Data Trending	●	●	●	●	●

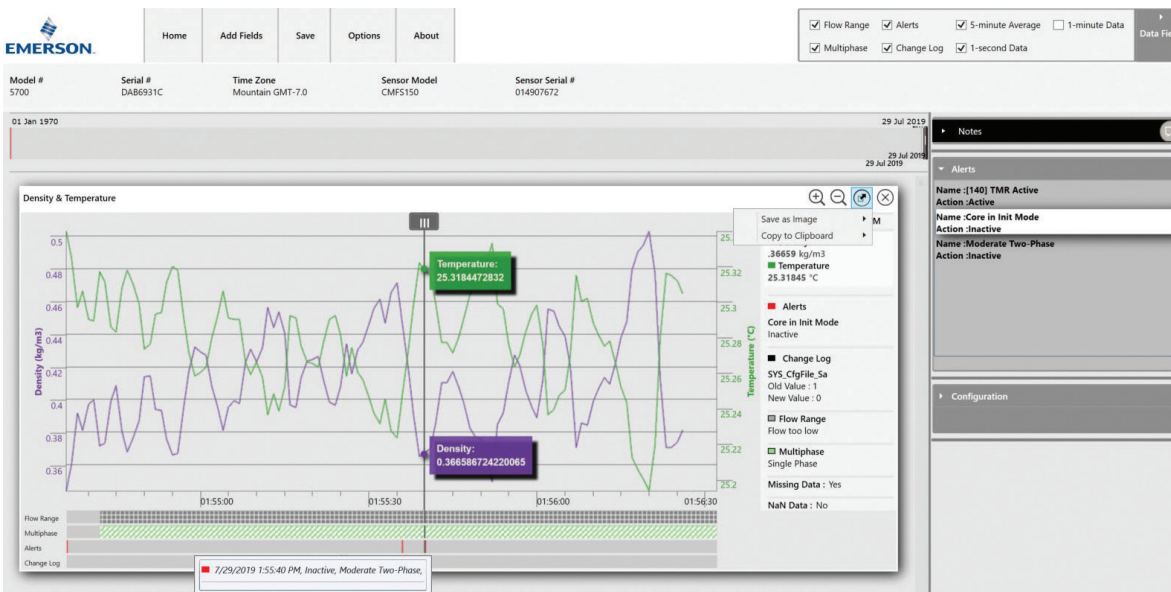

*ProLink™ III Professional can create data trends and data logs from all Micro Motion™ Coriolis, density, and viscosity products and Rosemount™ vortex and magnetic flow meters.

ProcessViz Data Visualization Software

This unique application delivers the power and flexibility you need to analyze your process information clearly and concisely. With this software, a technician no longer needs to spend valuable time manipulating raw data as the software extracts and transforms historian data creating a visual interface showcasing process variable information into a single view, allowing users to analyze their data in real-time.

ProcessViz enables the ability to clearly isolate, identify and visualize process disruptions and allows operators the opportunity to quickly remediate any process anomalies or issues utilizing these key features:

- Pinpoint the exact time of your process interruptions
- Use the slider to zoom in for a closer analysis or out for a broader view
- View detailed alert and time stamp information
