Rosemount™ TankMaster™ Mobile Inventory Management Software

Improve operational efficiency with immediate access to critical tank data to a wider range of stakeholders

Insights Delivered. Right Away.

For tank farm operators, inventory data is critical to run efficiently. All the way from accepting orders, receiving shipments, filling and emptying tanks, to closing books at the end of each month. Inventory status is what underpins operations and business decisions. Modern inventory management software enables more people to access information, providing live data at any time and any place.

Rosemount TankMaster Mobile inventory management software works seamlessly across smartphones, tablets and computers to access operational data. It is easy to use and provides instant inventory overview as well as quick access to tank details. Valuable information will no longer be stuck in the tank farm control room. Instead, shared inventory insight provides the opportunity to increase efficiency, drive productivity and improve colloboration throughout the supply chain.

Instant Access on Any Device

- Designed for computers, smartphones and tablets – independent of brand and operative system
- Mobile responsive design, optimized for touch screen devices
- Integrates with existing Rosemount TankMaster installations

Designed for Ease of Use

- Adaptive tank cards give immediate overview of critical inventory data
- One click to view in-depth details for each tank
- Quickly create a 'watchlist' of tanks to monitor closely
- Work efficiently by using tank groups - customized, predefined and automatic

Cyber-secure

- Compliant with international cybersecurity standard IEC 62443-3-3
- Supports 3-tier network architecture with firewalls to protect from unauthorized access
- New devices must be approved by administrator or via two-factor authentication
- TLS encrypted communication between system components protects data confidentiality

Simple License and User Management

- Manage your licenses and settings via web portal
- Download updates and manage subscriptions easily
- Control access to specific tanks, data points, etc.
- Leverage user groups to quickly grant right access to the right people

Manage your tank inventory with a unified software for smartphone, tablet and computer
