1 Introduction

This is an introduction to the Rosemount™ TankMaster™ Mobile Inventory Management software.

Rosemount TankMaster Mobile is an application for remote monitoring of tank farms. It is designed for standard web browsers and mobile phones. The application connects with servers that run Rosemount TankMaster inventory management software.

The graphical interface gives you a clear overview of tanks. Various views are available for different levels of detail.

Rosemount TankMaster Mobile is designed to meet applicable requirements for network and system security in international standard IEC 62443-3-3. It is designed for an architecture that supports segmentation of network layers and separate security zones with different access levels for various components.

Rosemount TankMaster Mobile is designed for the Docker platform. This ensures stable and reliable operation and simple installation in various computer network environments.

Subscribe to software updates

You can subscribe to Rosemount TankMaster Mobile updates for a specified period of time.

A license gives you access to software upgrades and security patches when available. Software updates are available on TankMaster.Rosemount.com/ServiceCenter.

1.1 Features

TankMaster Mobile features real-time information on tank status. It collects data from existing TankMaster systems, and presents it in web browser interface on local or remote client computers, tablets, and smart phones.

Features can be summarized as:

- Web browser based user interface
- Connects to tank server in existing TankMaster systems
- Allows remote tank monitoring via web browser
- Access live inventory data – when and where you need it
- Get instant overview of all tanks
- Easy-to-use web application optimized for computer, tablet, and smartphone
- Cyber secure solution, compliant with the IEC 62443-3-3 standard

Rosemount TankMaster Mobile allows you to remotely monitor your tank farm. A dedicated server connects TankMaster Mobile with virtually any standard web browser and presents data collected from connected TankMaster servers.

Figure 1-1: TankMaster Mobile Overview

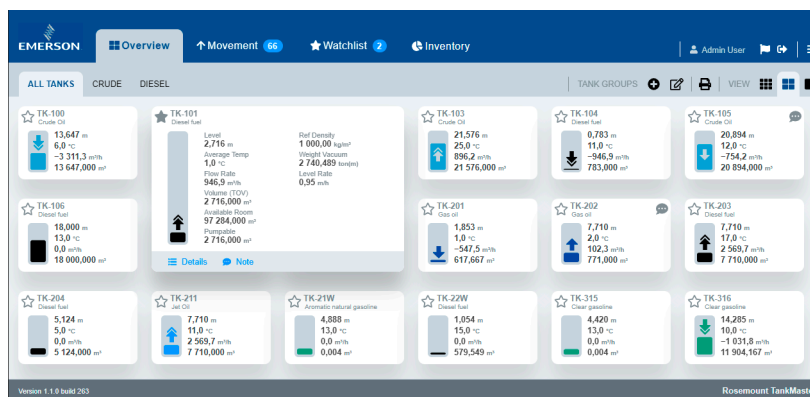

Figure 1-2: TankMaster Mobile Overview on Mobile Phone

TankMaster Mobile is based on servers that communicate with existing TankMaster tank server and provides measurement data and status information for presentation in a web user interface.

TankMaster Mobile supports responsive design principles. Tank cards and windows adapt to different screen sizes. User experience is not compromised as program windows are rescaled and re-sized.

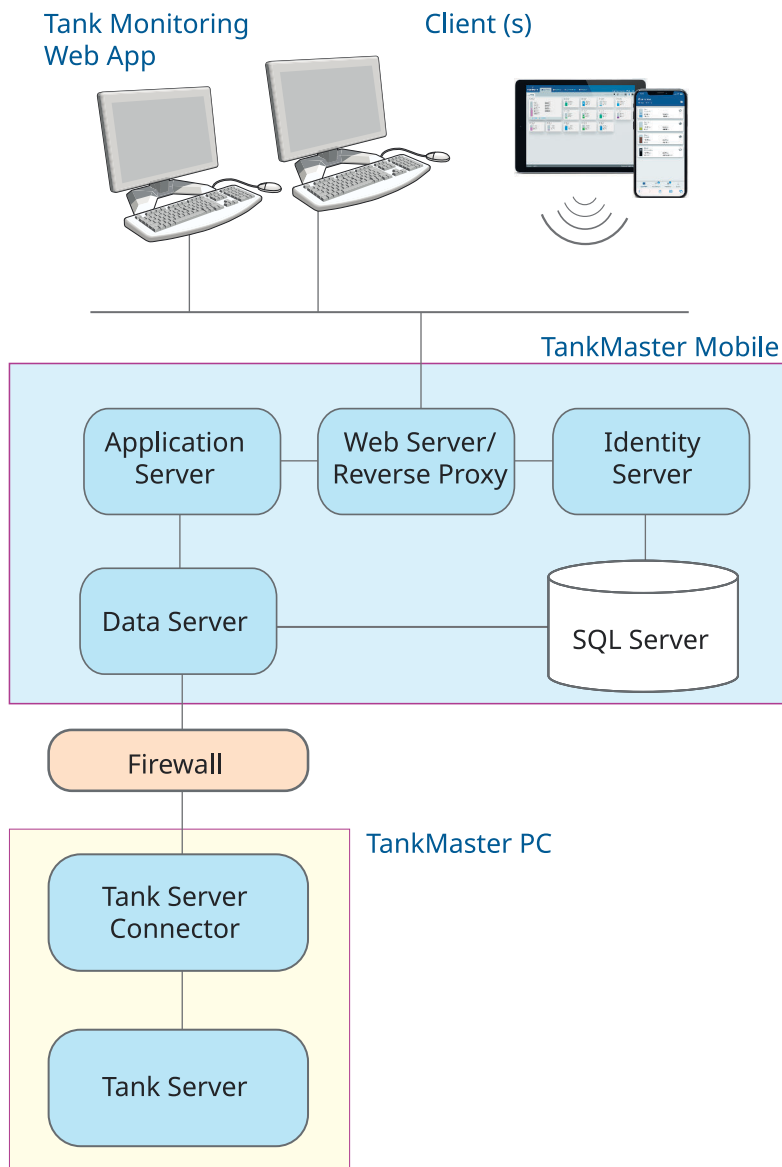

The **Tank Server** is part of the existing TankMaster system. It manages all measurement data and status information for the connected devices.

The **Tank Server Connector** communicates with the existing TankMaster system's Tank Server. It collects measurement data and status information and provides it to the **Data Server**.

The connector runs on a separate machine and exposes its ports to the plant network only. It will not allow traffic outside this network layer.

The **Data Server** feeds the **Application Server** with tank data. The **Application Server** then provides the encrypted information to connected web browser clients.

Figure 1-3: TankMaster Mobile System Architecture

1.2 Manual overview

This manual is a guide for using the Rosemount™ TankMaster™ Mobile application.

Chapter [Introduction](#) provides a description of the TankMaster Mobile workspace and system architecture.

Chapter [What is Rosemount TankMaster™ Mobile?](#) provides a brief introduction to the Rosemount TankMaster Mobile web browser interface.

Chapter [Getting started](#) provides information on how to start using the TankMaster Mobile web application.

Chapter [View tank data](#) describes tank data presentation with tank cards.

Chapter [View inventory data](#) describes how to set up and view inventory data cards.

Chapter [Reports](#) describes how to set up and view reports.

Chapter [Translations](#) describes how to manage translations for the Rosemount TankMaster™ Mobile application web interface.

Chapter [System administration](#) describes various system administration functions such as user administration, license management, and more.

Chapter [User settings](#) describes setup functions available for all users such as My Profile setup, changing password, and adding tank groups.

Chapter [Data presentation](#) provides an overview of how status information is presented in tank cards.

Chapter [License management](#) describes how to add a new Rosemount™ TankMaster™ Mobile license as well as various license management tasks

1.3 Technical documentation

The Rosemount Tank Gauging System includes a wide portfolio of user documentation. For a complete list, see product pages on [Emerson.com/Rosemount](https://www.emerson.com/Rosemount).

2 What is Rosemount TankMaster™ Mobile?

2.1 Start page

This is a brief introduction of what you can do in TankMaster Mobile Web app.

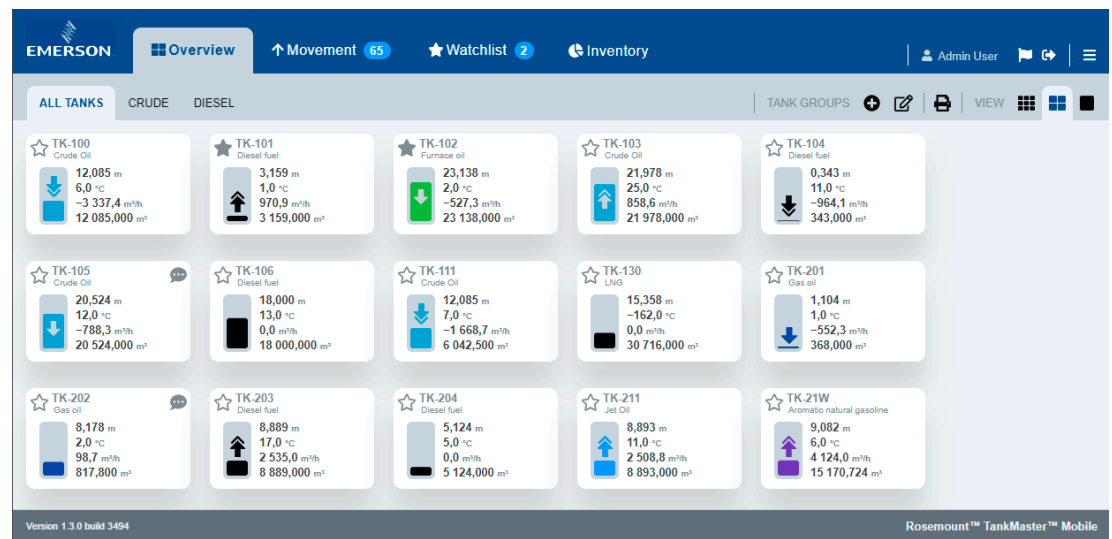

TankMaster Mobile provides you with several tools for efficient tank monitoring:

- Clear overview of tanks
- Use watchlists to monitor tanks of special interest
- Tank movements based on desired flow rate limits
- Each tank presented with a card
- Tanks can be organized in groups

Sign in to the TankMaster Mobile application as described in [Sign in procedure](#). The Overview page will appear showing tanks and tank data.

In the **All Tanks** tab each tank is presented with a tank card. You may change view to larger tank cards with more information.

Figure 2-1: Overview Page All Tanks

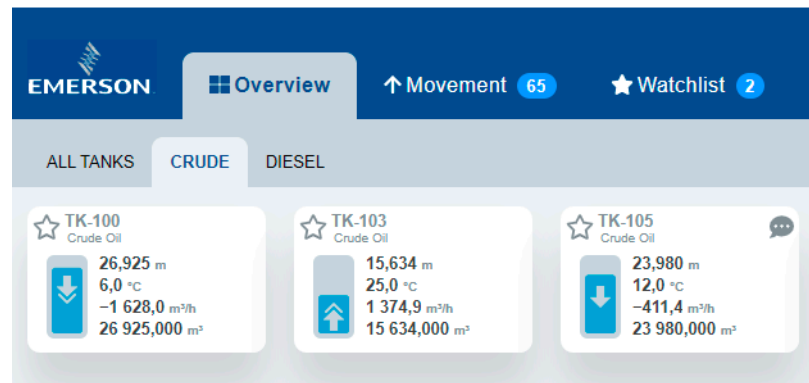

Tank groups

You may organize tanks in various tank groups that suit your product portfolio or other requirements.

Figure 2-2: Overview All Tanks

Figure 2-3: Overview Tank Groups

Movement and Watchlists

There are dedicated tabs for tank movement and watchlist.

Figure 2-4: Movement

3 Getting started

3.1 Preparations

This section shows how to navigate and sign in to the Rosemount™ TankMaster™ Mobile web application.

Prior to start using the TankMaster Mobile web app you need to make sure that a valid user account is available. An account can be created by the system administrator. The administrator grants access to view tanks and tank data. Note that you also need an approved device in order to access the web app. Device approval is part of first time sign in with a new device.

This is what you need to start using the TankMaster Mobile web app:

- Enabled user Id and password

Sign in with new device

In case you are going to sign in with a new device, it needs to be registered in the TankMaster Mobile system. You may register a device by using one of the following methods:

- As part of the log in procedure when signing in to the TankMaster Web app. Once registered, you will receive an email with a six digit registration code. Use this code as requested in the log in procedure.
- By contacting the system administrator.

Device registration can be turned off. However, for security reasons we recommend using this function as the standard option.

Note

In case you clear the web browser's history and cookies you need to register the device again.

Related information

[Sign in procedure](#)

[Security settings](#)

3.2 Preparations for mobile device users

For best user experience it is recommended that you:

- install the Emerson TankMaster CA digital root certificate on your mobile device
- add TankMaster Mobile to the home screen

By adding the start page to the Home screen you will ensure that TankMaster Mobile can be accessed as any other mobile device app.

TankMaster Mobile app is a Progressive Web Application (PWA) and is not downloaded from any app store. PWAs work across many devices and platforms. Once the TankMaster Mobile digital certificate is installed, the app acts and feels like a regular app without any web browser fields or buttons.

Related information

[TankMaster Mobile](#)

[Install certificate and app on Android device](#)

[Install certificate and app on iOS device](#)

3.3 Sign in procedure

The sign in procedure may differ slightly depending on whether you are signing in with a new device or not.

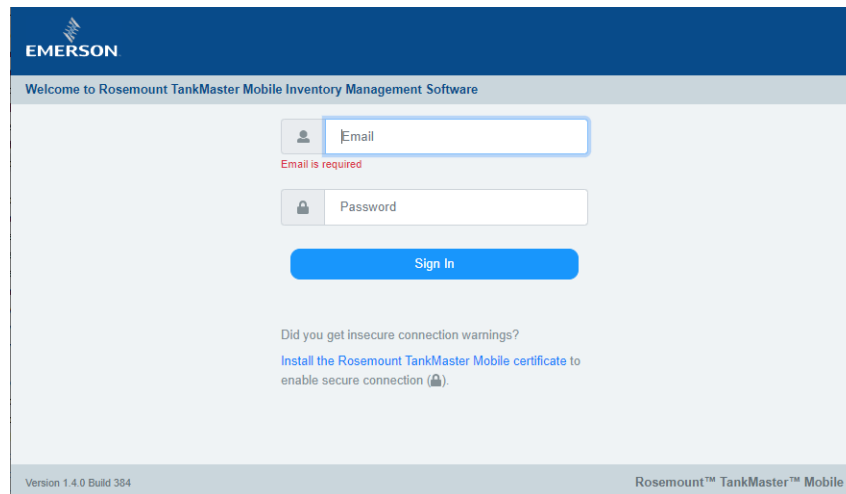

3.3.1 Sign in

Follow this procedure to sign in to the TankMaster Mobile web application.

This is the standard sign in procedure when using a registered device.

Procedure

1. Navigate to the TankMaster Mobile web page. Use the IP address (or URL) that was entered when installing the TankMaster Mobile program.

2. Optional: If a root certificate is not installed, you will be prompted the option to download a certificate prior to signing in. The root certificate allows your client machine to authenticate the TankMaster Mobile server. Even without a root certificate you will have a secure connection.
3. Enter your credentials.
4. Select **Sign In**.

Note

First time you sign in you will be prompted to register your device and change your password.

5. Now you are signed in.

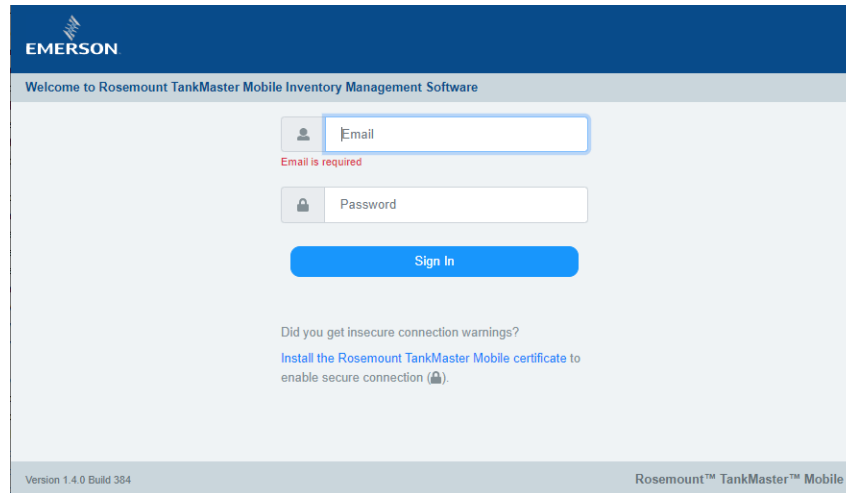

3.3.2 Sign in with new device

In case you sign in to the TankMaster Mobile web application with a new device, it needs to be registered in the TankMaster Mobile system. This must be done each time you sign in to your TankMaster Mobile account on a device for the first time, even in case other TankMaster Mobile users have signed in on that particular device on previous occasions. For security reasons your account must be associated with each device that you sign in from.

This section describes how to sign in and register a new device.

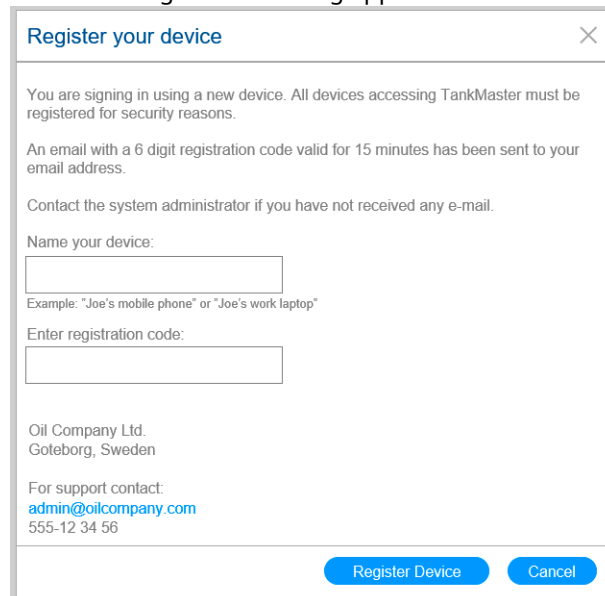

Procedure

1. Navigate to the TankMaster Mobile web page.

2. Enter your credentials.
3. Click the **Sign In** button.

The device registration dialog appears.

4. Open your mailbox and note the registration code.
5. Enter the registration code and a device name.
6. Click the **Register Device** button.
7. Now you are signed in.

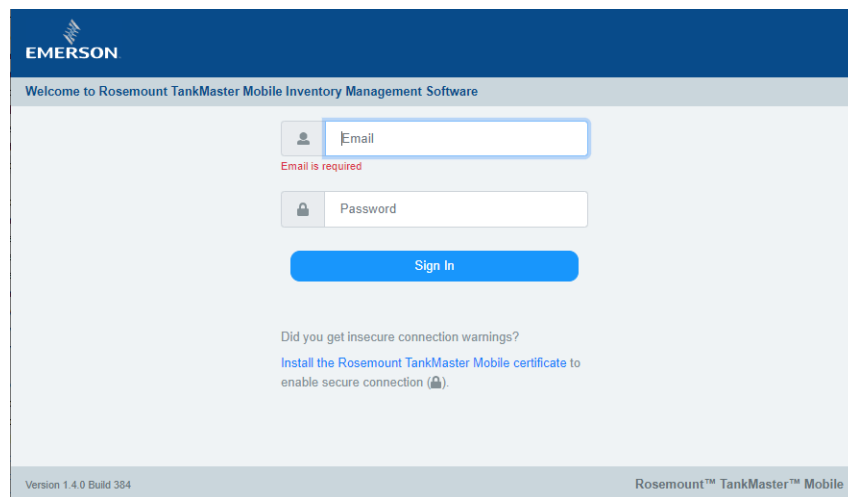

3.3.3 Sign in with new device and manual administrator approval

In case you sign in to the TankMaster Mobile web application with a new device, it needs to be registered in the TankMaster Mobile system. This must be done each time you sign in to your TankMaster Mobile account on a device for the first time, even in case other TankMaster Mobile users have signed in on that particular device on previous occasions. For security reasons your account must be associated with each device that you sign in from.

This section describes how to sign in and register a new device with administrator manually granting device access.

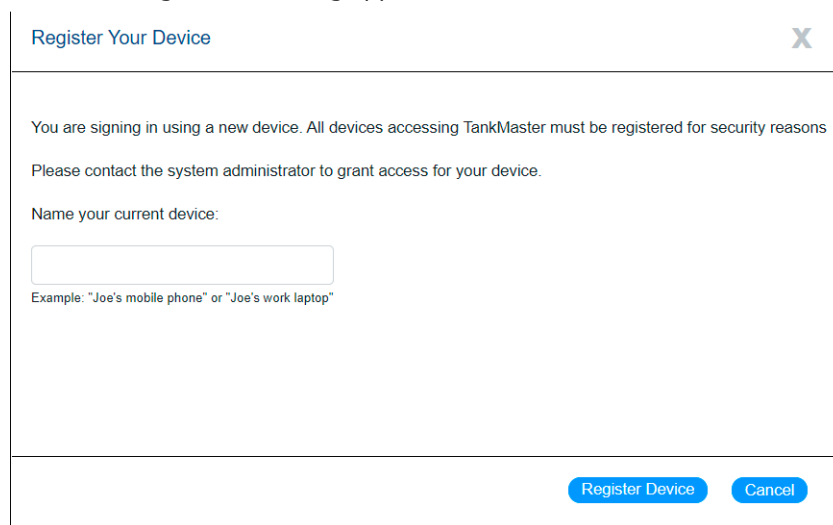

Procedure

1. Navigate to the TankMaster Mobile web page.

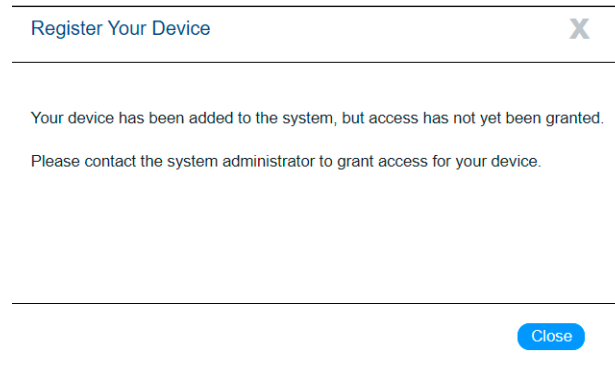

2. Enter your credentials.
3. Click the **Sign In** button.

The device registration dialog appears.

4. Enter a device name.
5. Click the **Register Device** button.
6. Now the system will verify that your device is added to the system.
You will be prompted to contact the system administrator for granting access.

7. Click the **Close** button.
Once your device is granted access you will be able to sign in.

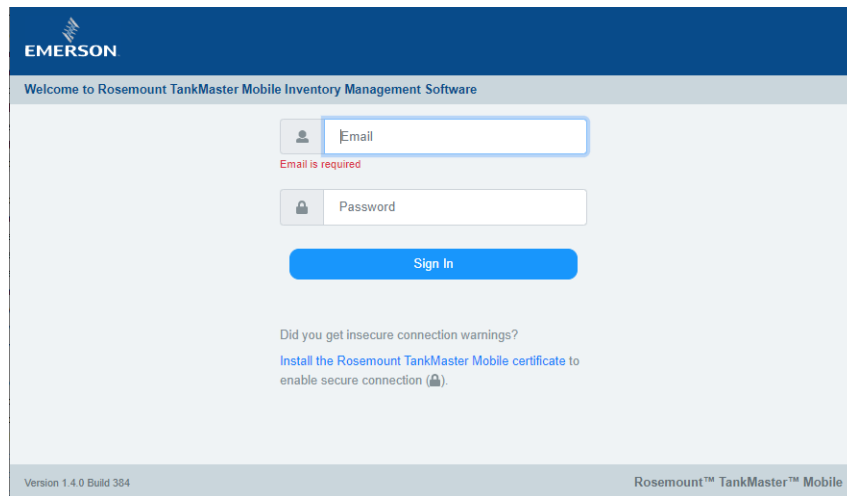

3.4 Install digital certificate

This is a description of how to install digital certificates for Rosemount™ TankMaster™ Mobile.

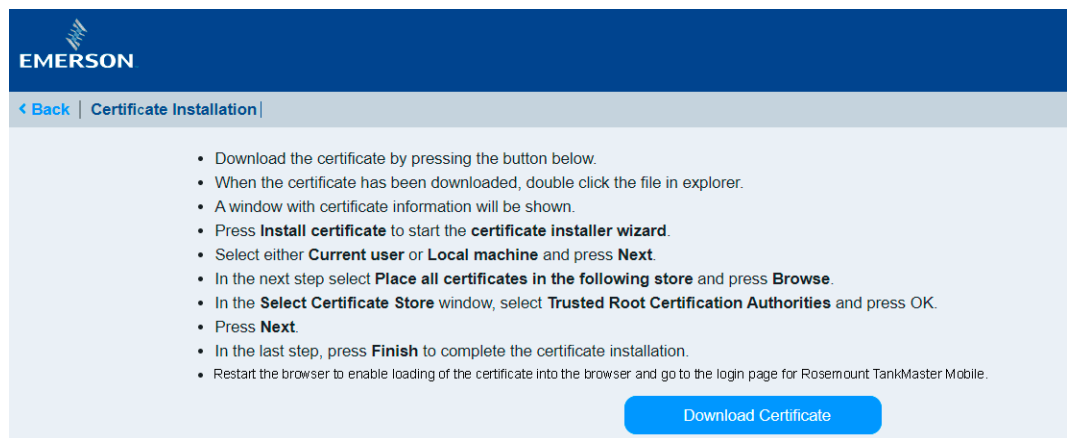

A digital certificate allows your client machine to authenticate the TankMaster Mobile server.

Procedure

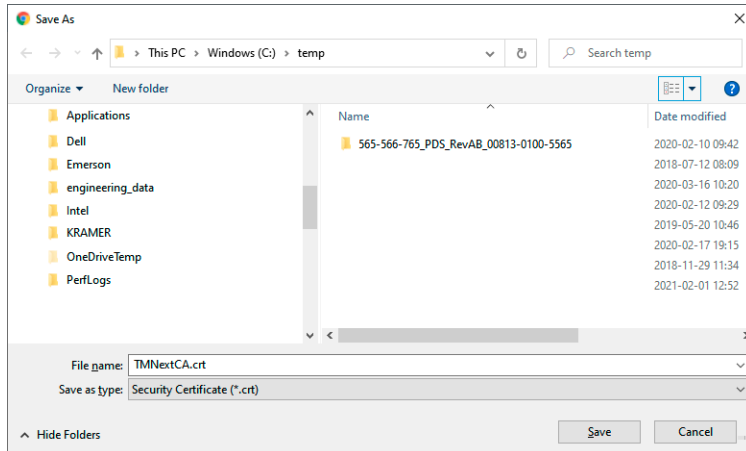

1. Open **TankMaster Mobile**.
2. Click **Install TankMaster Mobile certificate** for instructions how to download and install the TankMaster Mobile digital certificate.

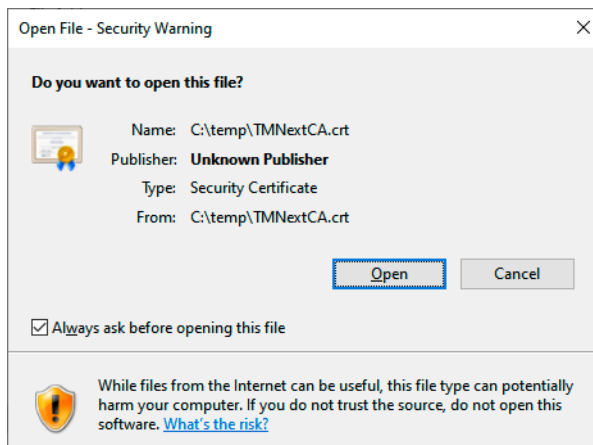

3. Read the instructions and select **Download Certificate**.

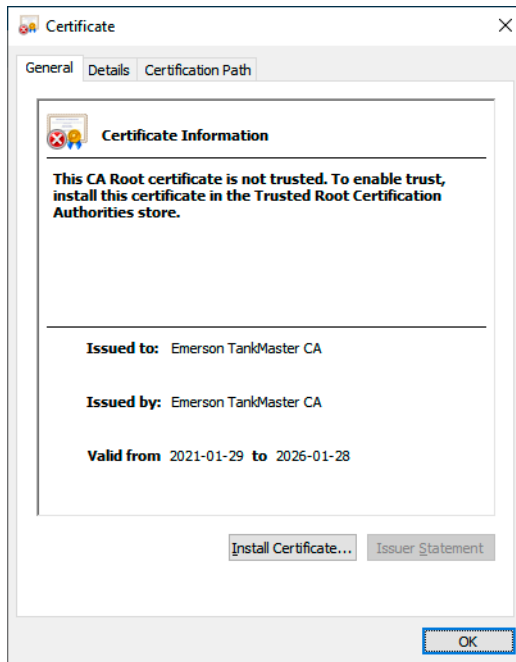

4. Choose an appropriate folder to store the certificate file.

5. Once downloaded, double-click the certificate file.
A security message appears.
6. Select **Open**.

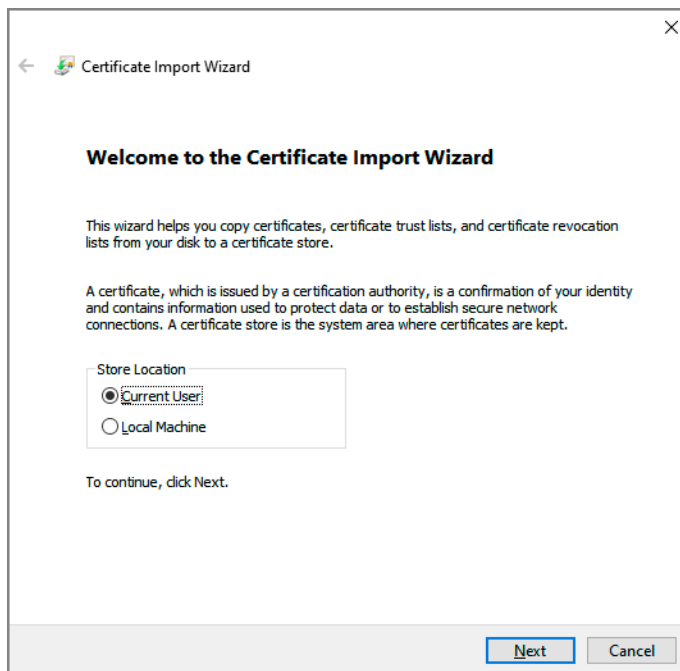

7. Select **Install Certificate**.

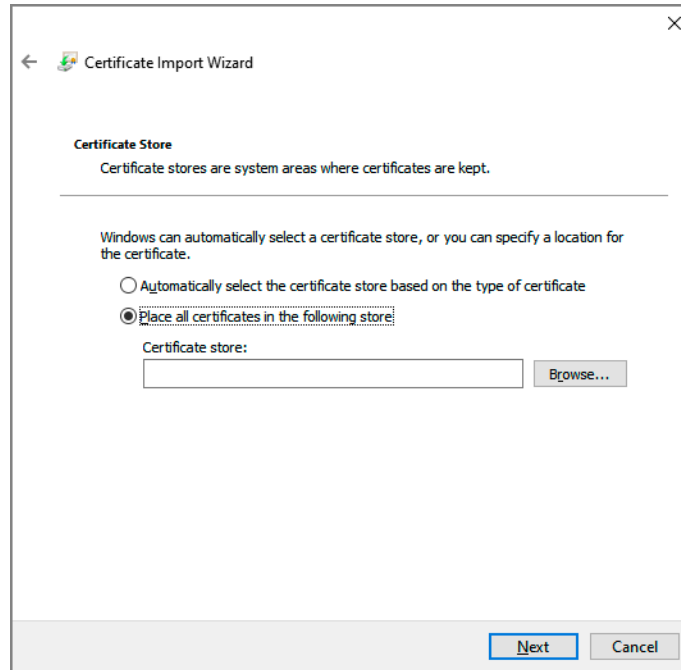

Now the certificate installation wizard will start.

8. Select **Current User** or **Local Machine**.

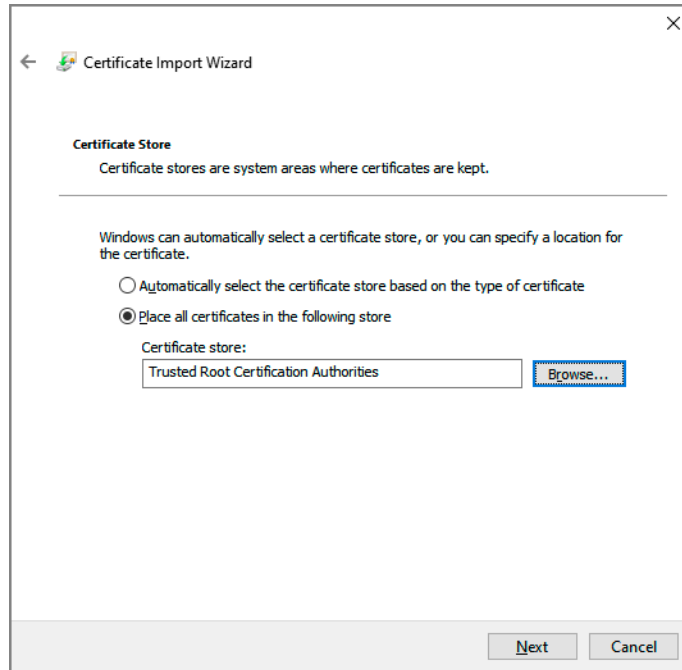

9. Select option **Place all certificates in the following store** and select **Browse**.

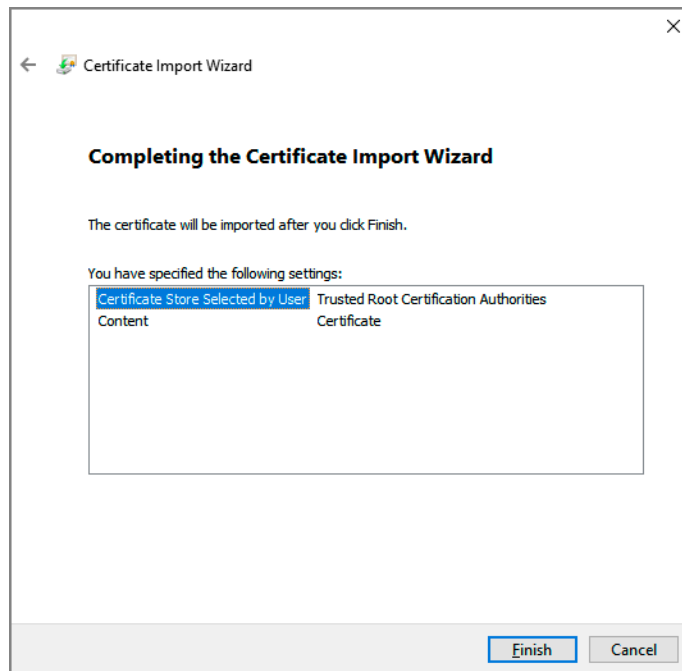

10. Select **Trusted Root Certification Authorities** and then **OK**.

11. Verify **Certificate store** and select **Next**.

12. Select **Finish** to complete certificate installation.

13. Now the certificate is installed. Close and restart Chrome browser to ensure that the certificate is properly loaded.

3.5 Install certificate and app on Android device

This is a description on how to install the Rosemount™ TankMaster™ Mobile certificate on Android phones and tablets. The description also includes how to add a TankMaster Mobile icon to the Home screen. TankMaster Mobile uses the Progressive Web App (PWA) technology which means that the app is not downloaded from Google Play store. PWA requires a certificate to be installed, then the PWA acts and feels like an app.

Procedure

1. Open the **Chrome** app.

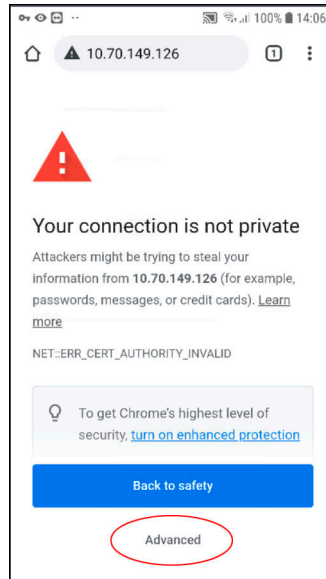

2. In the address field enter the IP address (or URL) for the Rosemount TankMaster Mobile server.

Note

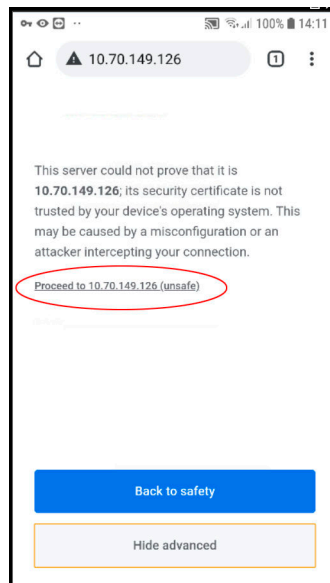

The IP address in this instruction is just an example and cannot be used for your server.

3. In case it is the first time you visit this page, a warning message will appear since your device has no TankMaster Mobile certificate installed. Select **Advanced** to continue.

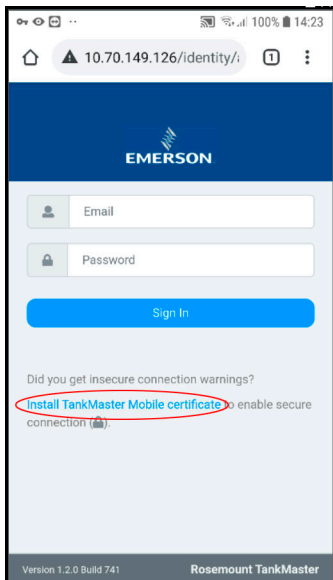

The warning is a standard text that appears for unknown web sites without valid digital certificate.

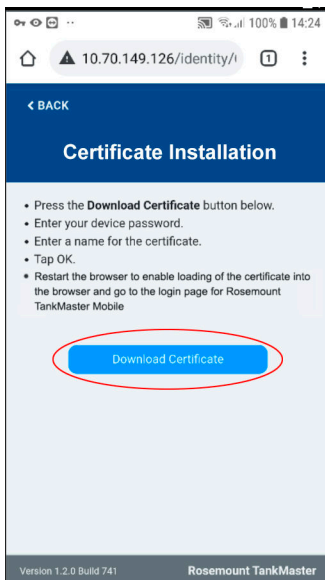

4. Select the link **Proceed to ... (unsafe)** .

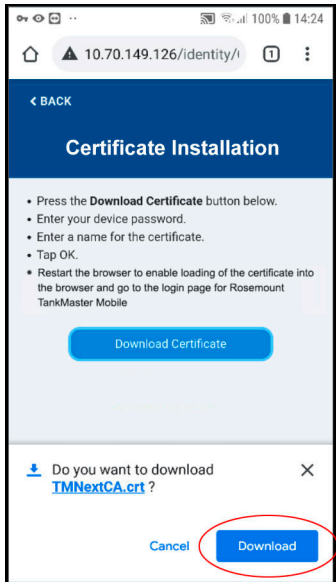

5. On the sign in page, select **Install TankMaster Mobile certificate**. This will open a page that allows you to download a digital root certificate for your mobile phone/tablet client.

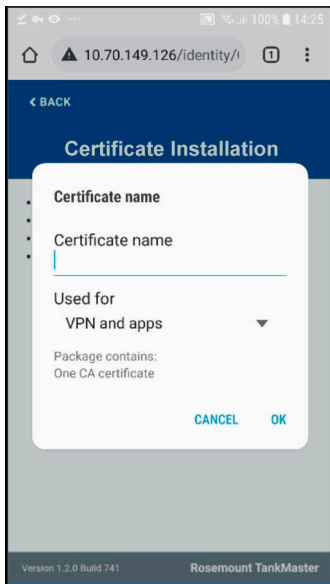

6. Select **Download Certificate** to download a root certificate for your mobile phone/tablet client.

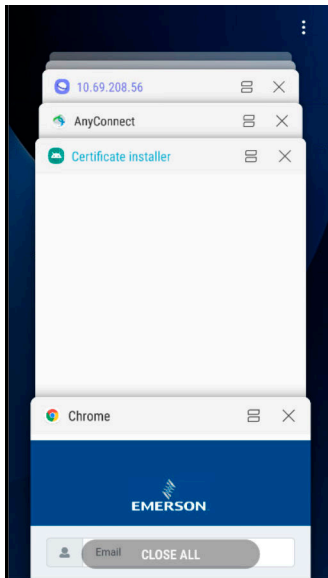

7. Select **Download** to start downloading the certificate.

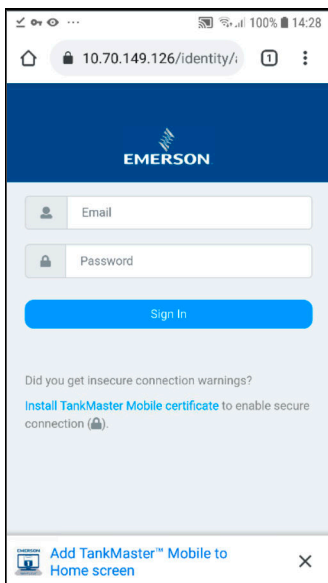

8. Name your certificate and click **OK**.

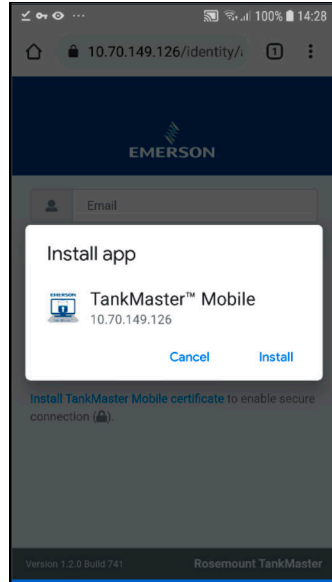

9. Now the certificate is installed. Close and restart the Chrome app to ensure that the certificate is properly loaded.

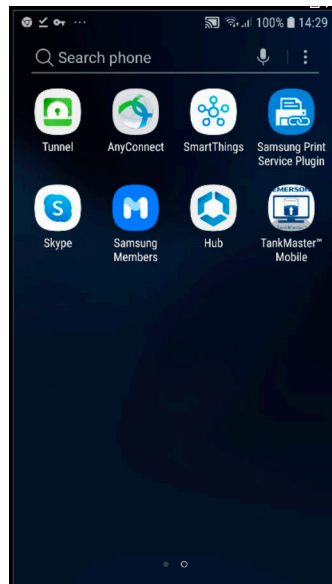

10. Enter the IP address to the TankMaster Mobile start page if it does not appear automatically. **Add TankMaster Mobile to Home screen** should appear at the bottom of the screen. Select this option if you would like to install TankMaster Mobile as an app on the Home screen.

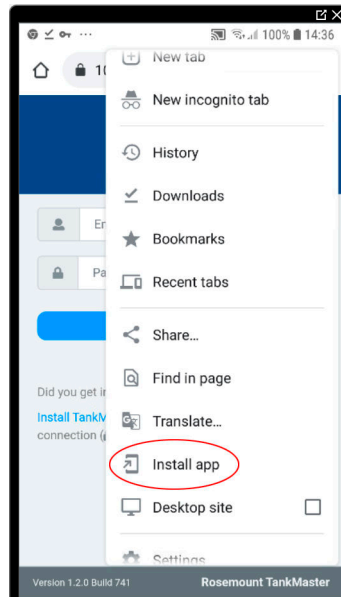

11. Select **Install**.

12. Now the **TankMaster Mobile** icon appears on the Home screen.

- Optional: In case you chose not to install the TankMaster Mobile icon on the Home screen, it can be installed at a later occasion. In the Chrome web browser, open **Settings** in the upper right-hand corner of the web browser and select **Install app**.

3.6 Install certificate and app on iOS device

This is a description on how to install the Rosemount™ TankMaster™ Mobile certificate on iOS phones and tablets. The description also includes how to add a TankMaster Mobile icon to the Home screen. TankMaster Mobile uses the Progressive Web App (PWA) technology which means that the app is not downloaded from Apple App store. PWA requires a certificate to be installed, then the PWA acts and feels like an app.

Procedure

1. Open the **Safari** app.

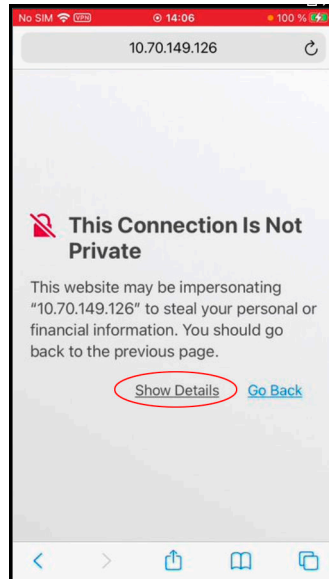

2. In the address field, enter the IP address (or URL) to the Rosemount TankMaster Mobile server.

Note

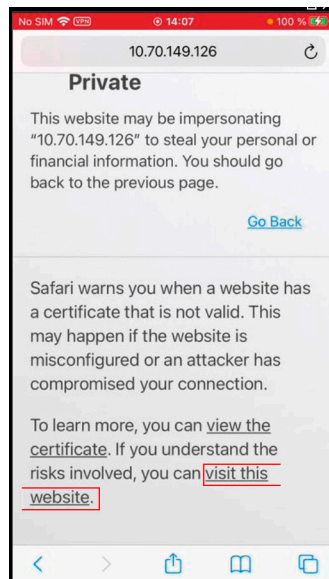

The IP address in this instruction is just an example and cannot be used for your server.

3. In case it is the first time you visit this page, a warning message will appear since your device has no TankMaster Mobile certificate installed. Select **Show Details** to continue.

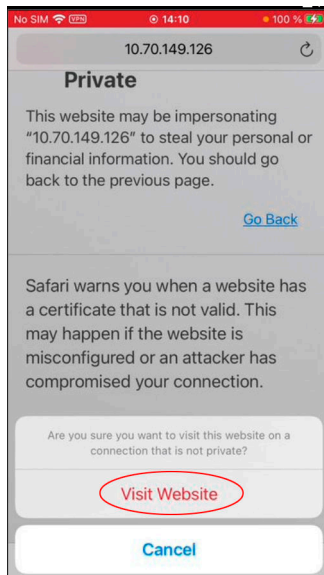

The warning is a standard text that appears for unknown web sites without valid digital certificate.

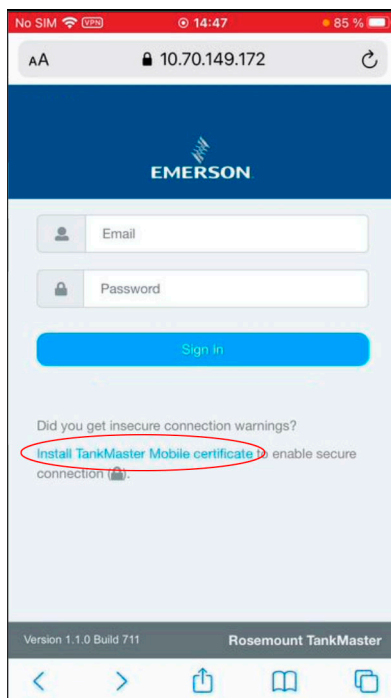

4. Select **visit this website** to proceed.

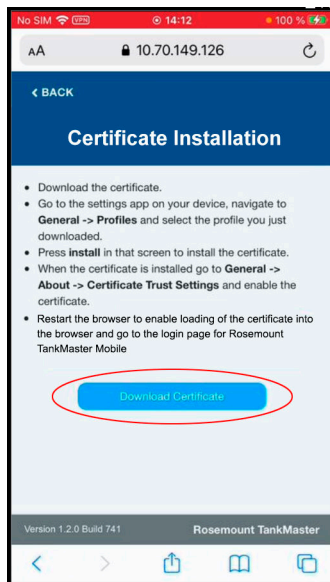

5. Select **Visit Website**.

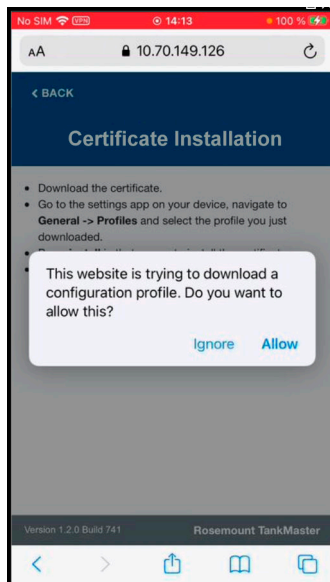

6. On the sign in page, select **Install TankMaster Mobile certificate**. This will open a page that allows you to download a digital root certificate for your mobile phone/tablet client.

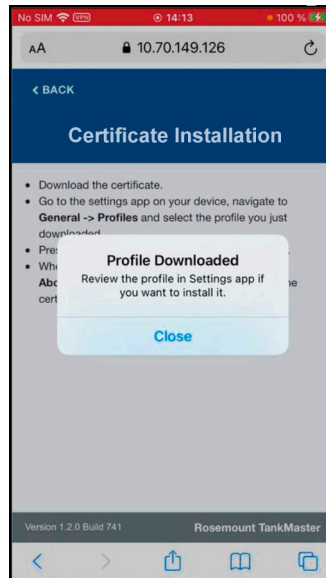

7. Select **Download Certificate** to download a root certificate for your mobile phone/ tablet client.

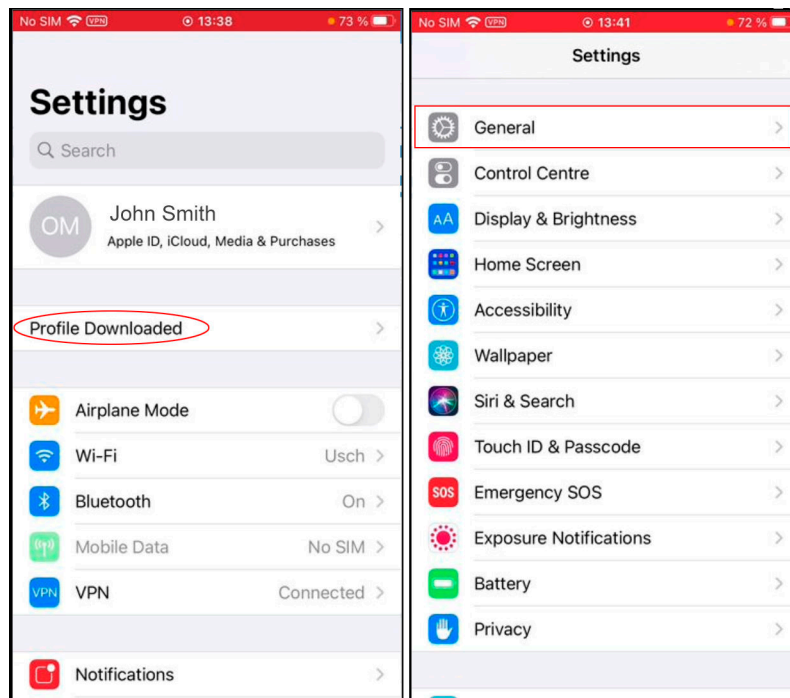

8. Select **Allow** to start downloading the certificate.

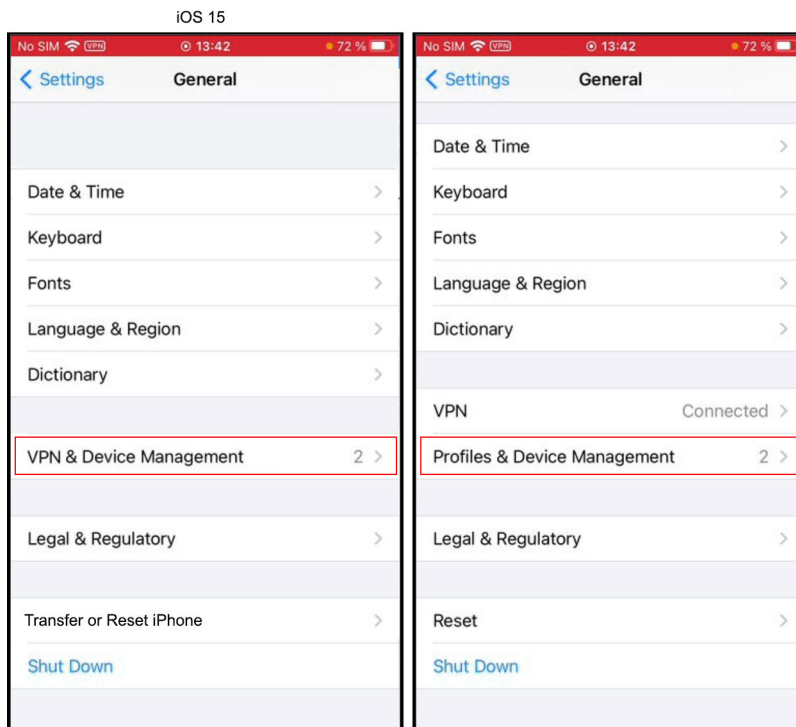

9. Once the certificate is downloaded you will have to open **Settings** in order to install it. Select **Close** to proceed.

10. Open **Settings** and navigate to **General**. As another option, you may select **Profile Downloaded** and proceed to step [Step 13](#).

11. Select **General** → **VPN & Device Management** (iOS 15). For previous iOS versions select **General** → **Profiles & Device Management**.

12. Select the **Emerson TankMaster CA** profile.

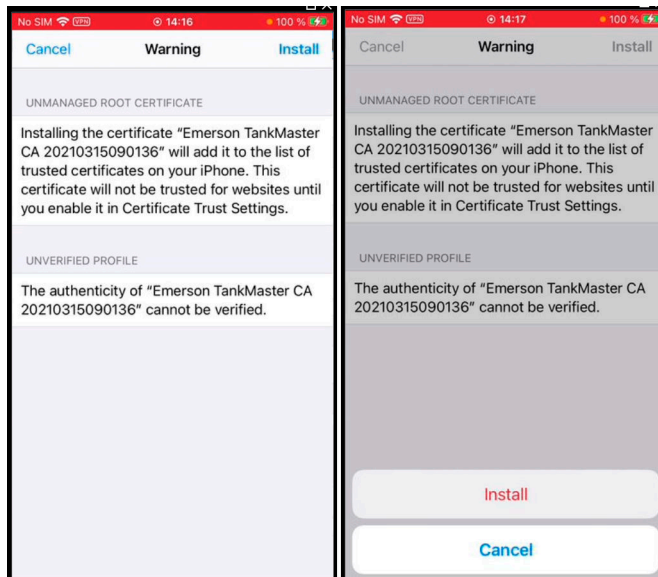

13. Select **Install**.

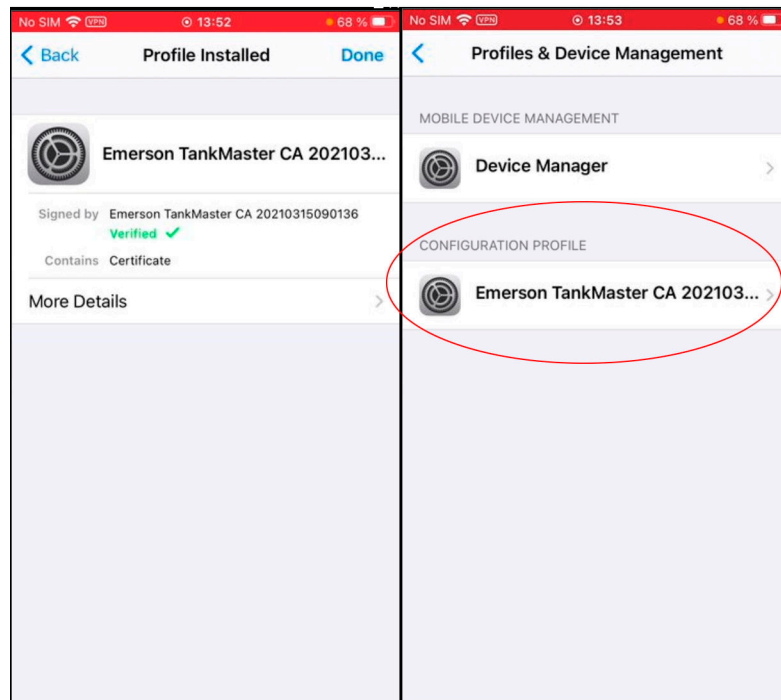

You will be prompted to enter your pass code.

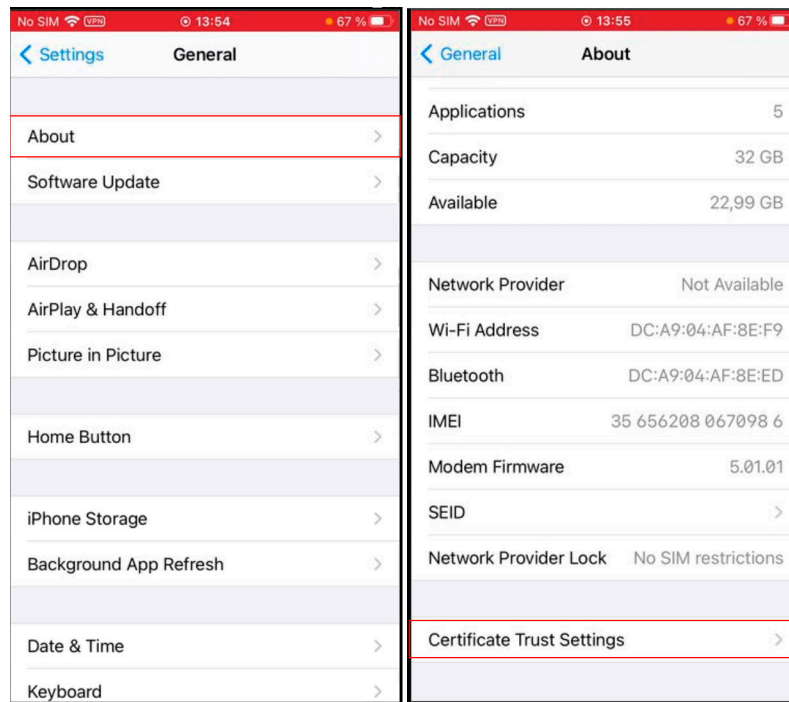

14. Select **Install** to add the certificate to the list of trusted certificates.

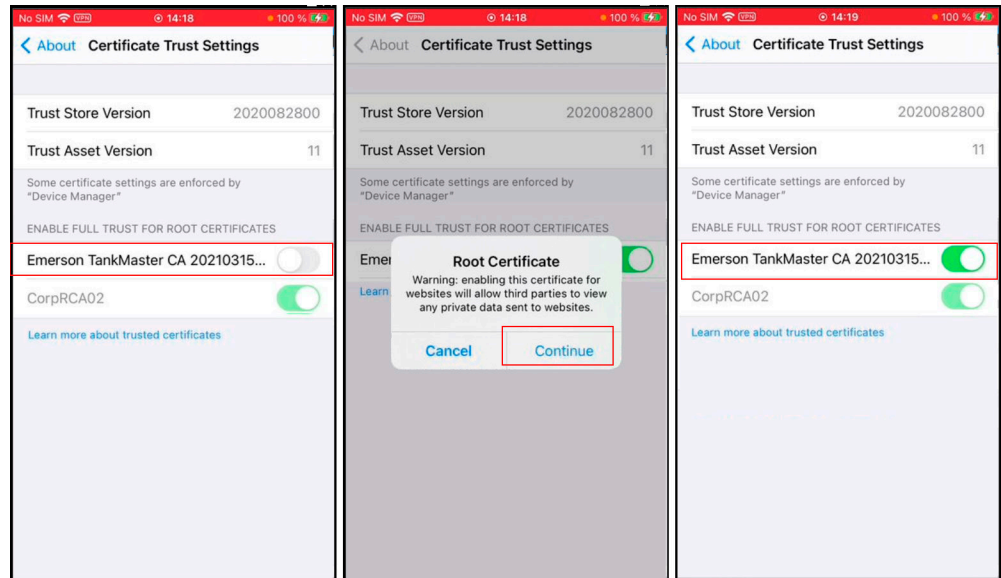

15. Now the certificate is installed. Click **Done** to return to **Profiles & Device Management** to see the installed certificate.

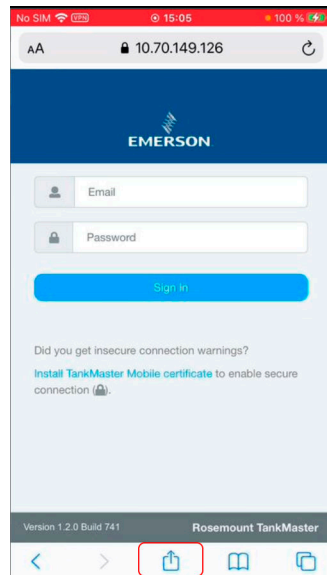

16. Once installed you will have to enable the certificate in order to allow the web browser to recognize TankMaster Mobile as a trusted site. Return to **General** and open **About** → **Certificate Trust Settings**.

17. To enable the certificate:
 - a) Locate the **Emerson TankMaster CA** certificate and select the enable button.
 - b) Click **Continue**.
 - c) Verify that the certificate is enabled.

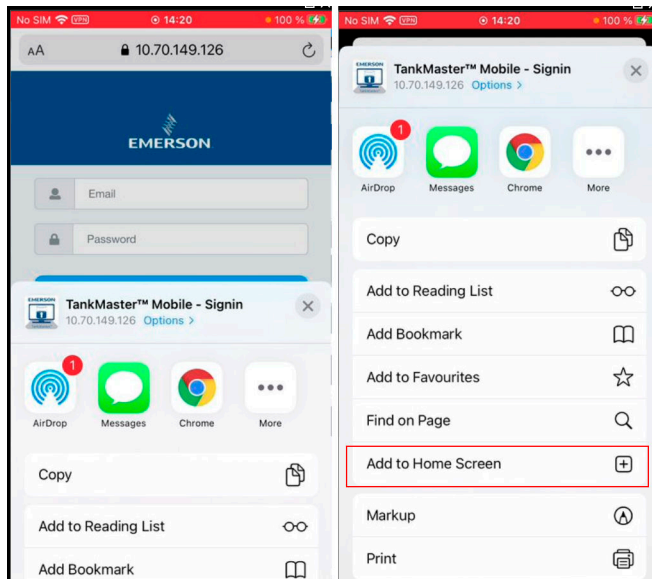

18. Now the certificate is installed. Close and restart the Safari browser to ensure that the certificate is properly loaded.
19. Return to the sign in page and select the **Share** button at the bottom of the page if you want to install TankMaster Mobile as an App.

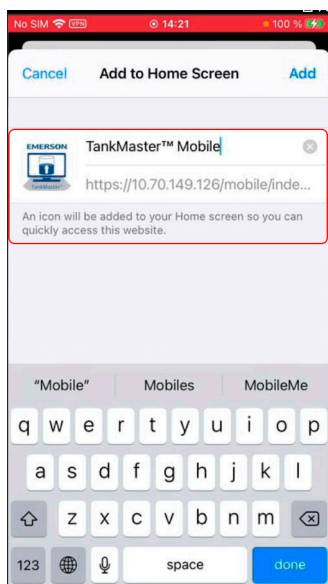

Note

When you sign in for the first time after installing the certificate you will have to register the device as a new device again.

20. Scroll down to **Add to Home Screen** and select this option.

21. Edit the text to the desired title for the app, and click **Add** to install it on your Home screen.

22. Now the TankMaster Mobile page will appear as an app icon on the Home Screen.

4 View tank data

This section presents the concept of tank cards.

Tank data is presented on tank cards of various size. Small tank cards show tank name and a bar graph that represents current product level. Product movement is indicated by a symbol showing direction and minor or major flow rate. A symbol indicates if the tank is included in the watch list.

More data such as product level, level rate, temperature, and volume is presented on medium size tank cards. The large tank cards present extended information including up to 12 tank parameters.

4.1 Configure tank data view

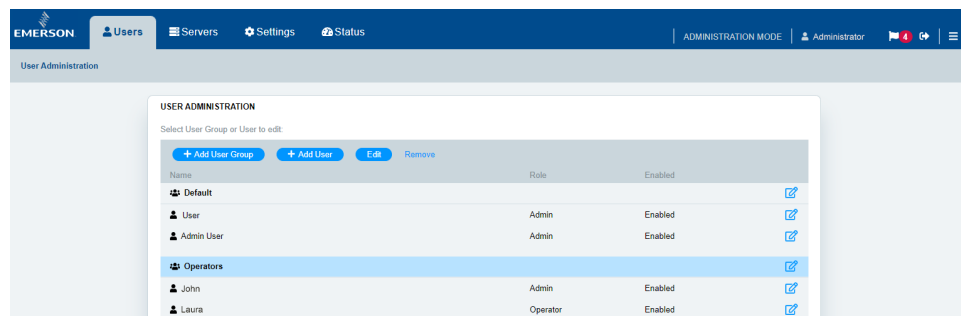

This is a brief summary of how to configure tank variables to be available in tank cards for the selected user group. See **Related information** for links to more information.

Prerequisites

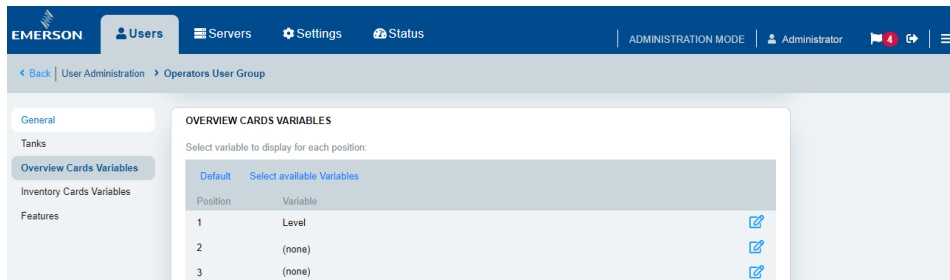

Ensure that you are logged in to TankMaster Mobile as **administrator**.

Procedure

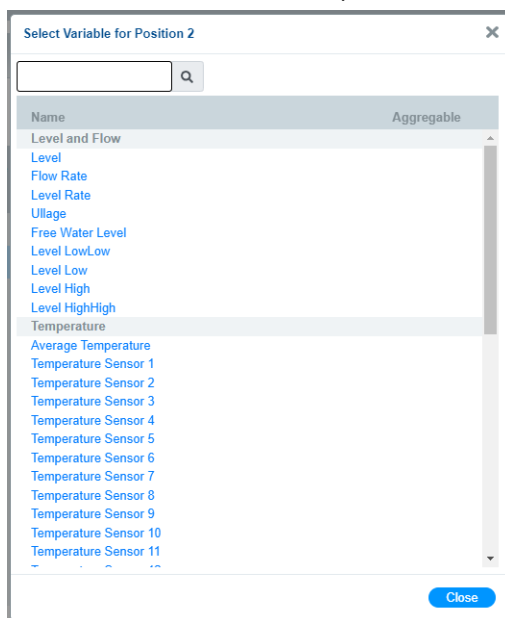

1. Select the **Users** menu.
2. Select a user group and then the **Edit** button.

3. Select the **Overview Cards Variables** option from the list on the left-hand side.

4. For each position click the **Edit** button on the right-hand side and select the desired tank variable for that particular tank card position.

5. Click **Save** once you are finished.

Related information

- [Administration mode](#)
- [Map tanks and tank data to a user group](#)

4.2 Tank data setup

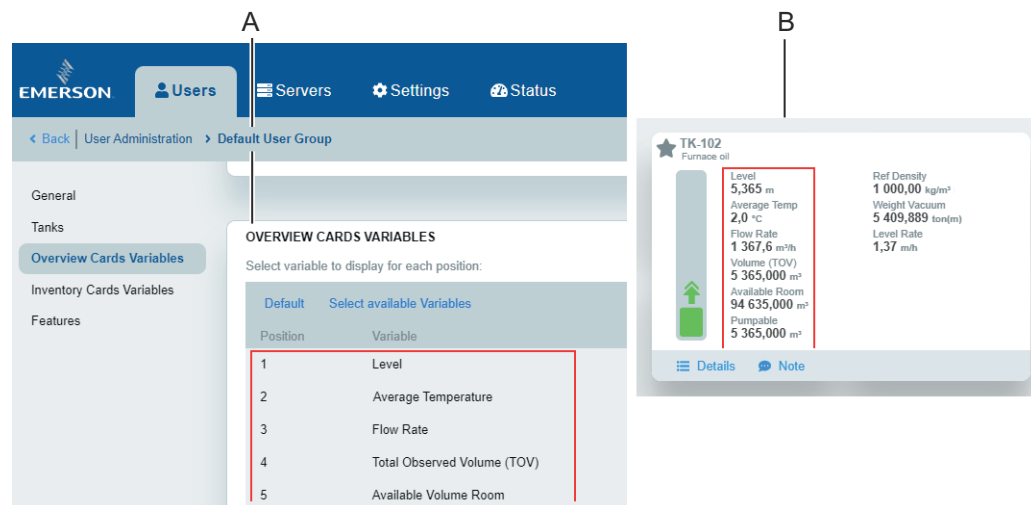

There are several categories of tank variables which can be configured for presentation in the TankMaster Mobile app.

Each tank is presented with a tank card that shows tank variables and current inventory status. A specific set of variables available for a user group is configured by the system administrator. Standard variables such as Level, Temperature, Level rate and many more can be added to the list.

In medium size cards the first four variables are shown. Large size tank cards can show up to 12 variables.

Figure 4-1 illustrates configuration of first five variables and resulting tank card.

4.3 Tank cards

TankMaster Mobile supports tank cards of various design for presentation of tank data.

Figure 4-2: Tank Cards

- A. Select tank card size
- B. Medium size tank cards

Related information

[Data presentation](#)

4.3.1 Small size tank cards

Small size tank cards provide an overview of a large number of tanks; product level, tank name, and watchlist symbol. Product movement, up or down, is indicated by arrows. The arrow size indicates level rate.

Figure 4-3: Small Size Tank Cards

- A. Watch list
- B. Tank name
- C. Bar graph

[Tank movement limits](#)
[Expanded tank card](#)

4.3.2 Medium size tank cards

Medium size cards provide an overview of tanks, and a limited set of tank variables and measurement data such as:

- Product level
- Average temperature
- Level rate
- Volume

The actual data that is presented can be configured specifically for each user group by mapping tanks and tank data.

Medium size cards also show whether the tank is on a watch list, and indicate if there is a tank note.

Figure 4-4: Tank Card Description

- A. Watch list
- B. Tank name
- C. First four parameters from the list of tank parameters available for this user group

- [Expanded tank card](#)

4.3.3 Large size tank cards

Large size tank cards can show up to 12 tank variables. Variables can be configured by selecting from a wide range of variables such as:

- Product level
- Average temperature
- Free Water Level
- Volume
- Level rate

Figure 4-5: Tank Card Description

4.3.4 Expanded tank card

You may expand a tank card by clicking on it. Then more information will be displayed about the tank. The expanded card shows tank variables and a menu bar with extra features.

At the bottom of the tank card you will find menu options such as **Details** and **Note**. Available options depend on license and system setup.

Note that an expanded tank card temporarily covers the nearest small or medium size cards. The hidden cards appear as soon as the expanded card returns to its normal state.

Figure 4-6: Expanded Tank Card

4.5 Tank groups

The **Overview** page presents all available tanks and tank groups.

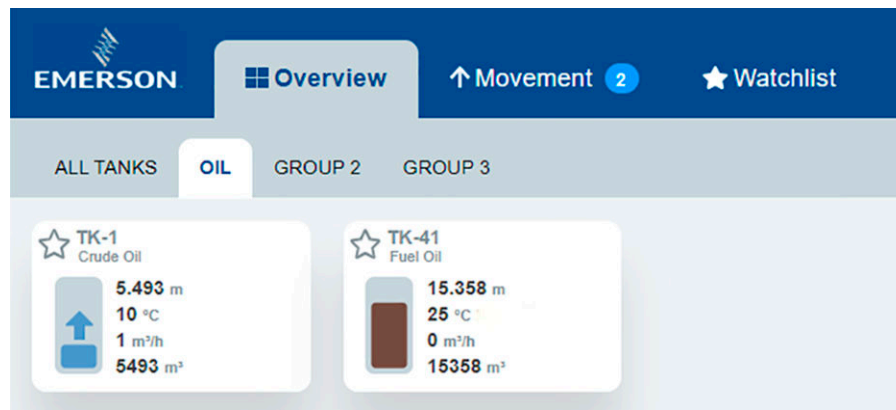

The menu bar shows the selected tank group.

Figure 4-10: Overview Page

You may organize tanks in groups based on product or any other suitable concept.

Figure 4-11: Example of Tank Group for a Product Type

Related information

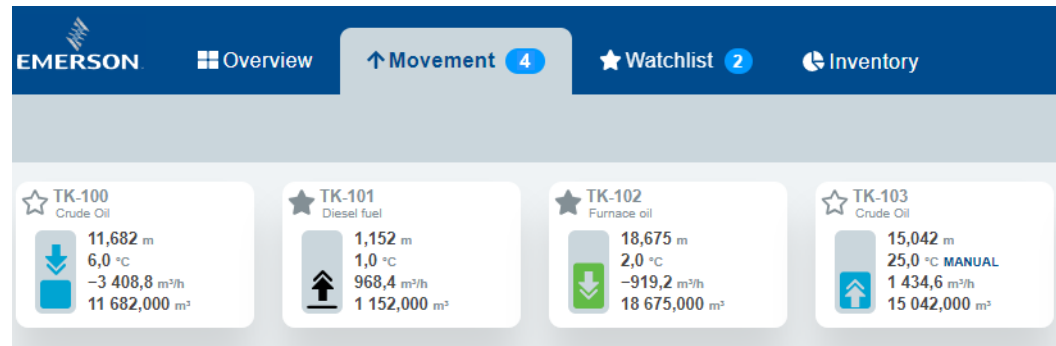

[Tank groups](#)

4.6 Tank movement

The **Overview** tank view shows all tanks including tank movements. The **Movement** menu lets you view only those tanks in which the product level is moving.

The **Movement** view is dynamic and tanks may appear and disappear depending on the current status. The number of moving tanks is indicated on the **Movement** menu regardless if the menu is selected or not.

Figure 4-12: Tank Movement View

The arrow size that indicates movement changes in case movement rate exceeds a specified limit.

There is a **Minor Limit** and a **Major Limit** that can be set by a **System Administrator**.

The tank starts indicating tank movement when movement rate exceeds the **Minor Limit**. For rates exceeding the **Major Limit**, the arrow size and appearance changes to indicate a high movement rate.

Figure 4-13: Tank Movement Rate

- A. Level rate above Minor Limit
- B. Level rate above Major Limit

Related information

[Tank movement limits](#)

4.7 Tank notes

You may attach an editable tank note on each tank card.

When a tank card has a tank note, an indicator appears in the upper right-hand corner of the card. By clicking the icon you may view and edit the tank note.

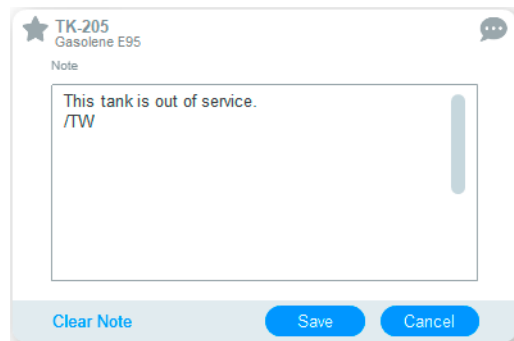

Figure 4-14: Tank Card with Tank Note

A. Tank note icon

When clicking the tank note icon a dialog appears that allows you type a text message. Tank notes are visible for all users.

Figure 4-15: Tank Note Window

4.8 Watchlists

Watchlist symbols indicate whether the tank is included in a watchlist or not. Tanks can be added to the watchlist in any view or tank card.

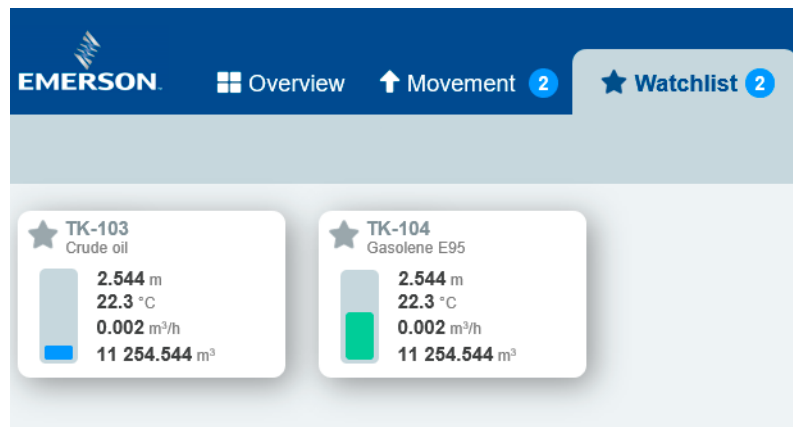

Figure 4-16: Watch List Symbols

- A. Watchlist cleared
- B. Tank is included in Watchlist

The **Watchlist** menu lets you view all tanks included in the watchlist.

Figure 4-17: Watchlist Menu

5 View inventory data

This section presents how to set up and view inventory data cards.

Inventory data is presented on cards of various size; small, medium, and large inventory tank cards. This is similar to standard overview tank cards.

Data such as Total Observed Volume (TOV), Gross Observed Volume (GSV), Net Standard Volume (NSV), and more is presented on the tank cards. The large tank cards show extended information including up to 12 tank parameters.

[Configure available features for user group](#)

[List of variables and abbreviations](#)

5.1 Configure inventory view

This is a brief summary of how to configure inventory card variables for the selected user group. See **Related information** for links to more information.

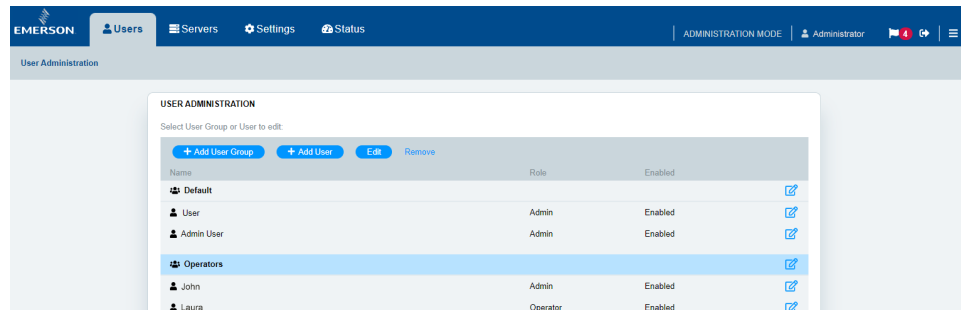

Prerequisites

Ensure that you are logged in to TankMaster Mobile as **administrator**.

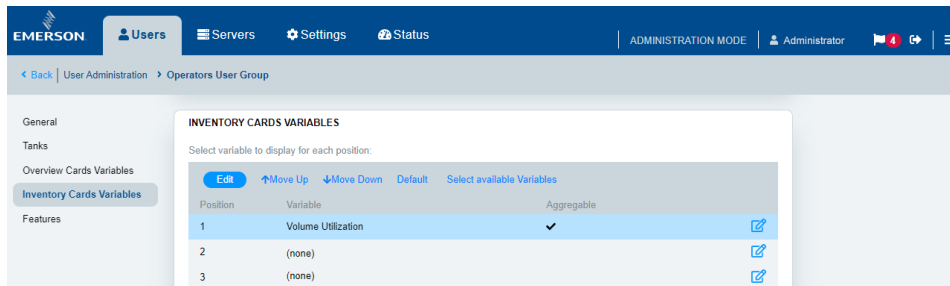

Ensure that **Inventory View** feature is enabled for the user group.

Procedure

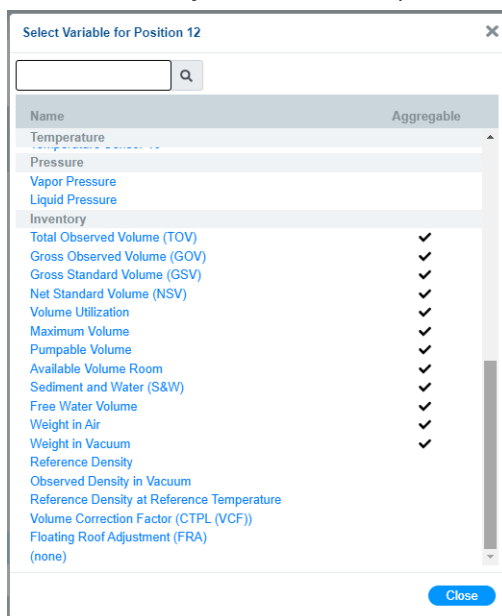

1. Select the **Users** menu.
2. Select a user group and then the **Edit** button.

3. Select the **Inventory Cards Variables** option from the list on the left-hand side.

4. For each position click the **Edit** button on the right-hand side and select the desired inventory variable for that particular inventory card position.

5. Click **Save** once you are finished.

Related information

- [Administration mode](#)
- [Configure inventory variables for user group](#)

5.2 Inventory data setup

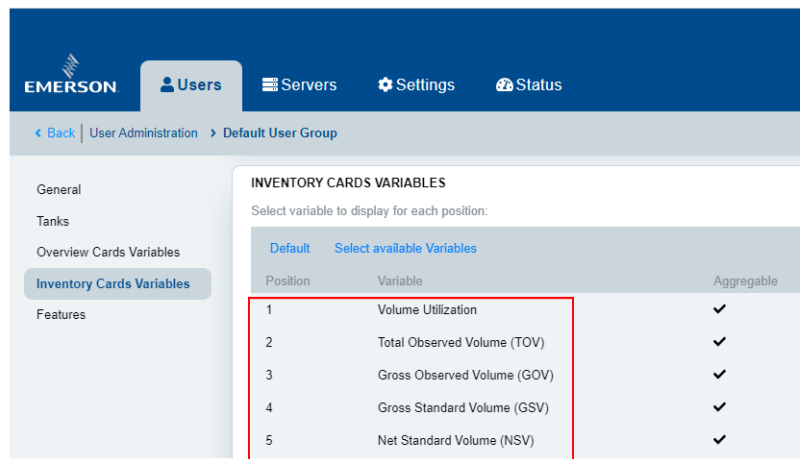

There are several categories of inventory variables which can be configured for presentation in the Rosemount TankMaster Mobile app.

Each tank is presented with a tank card that shows inventory variables and current status. A specific set of variables available for a user group is configured by the system administrator. Standard variables such as Total Observed Volume (TOV), Gross Observed Volume (GOV), and many more can be added to the list.

Medium size cards show the first four variables. Large size tank cards can show up to 12 variables.

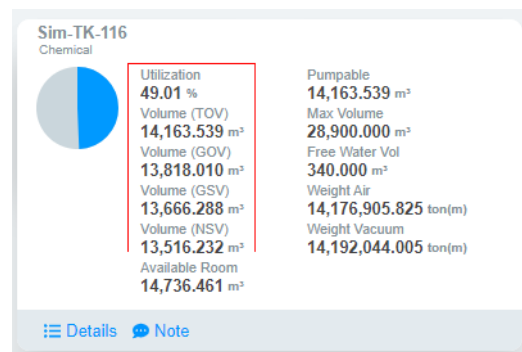

Figure 5-1 illustrates configuration of first five inventory variables and resulting tank card.

Figure 5-1: Inventory Data Setup

The resulting tank card shows the specified inventory variables:

Figure 5-2: Inventory Tank Card

Related information

- [Configure inventory view](#)
- [View inventory cards](#)

5.3 View inventory cards

The **Inventory** page shows inventory data such as Total Observed Volume (TOV), Gross Observed Volume (GOV), Gross Standard Volume (GSV), and much more.

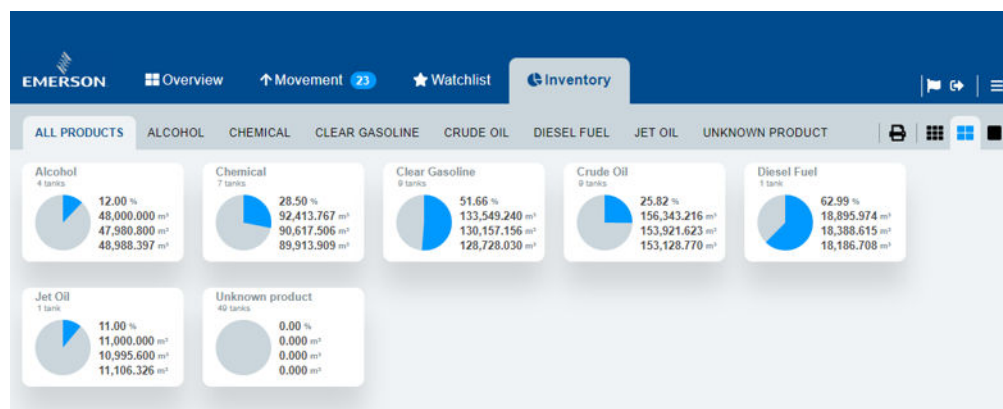

Tanks are organized in groups based on product type.

The **All Products** group shows the total volumes for each product group.

Each card shows the total sum of inventory data for a particular product.

Separate tabs show all tanks for the selected product type.

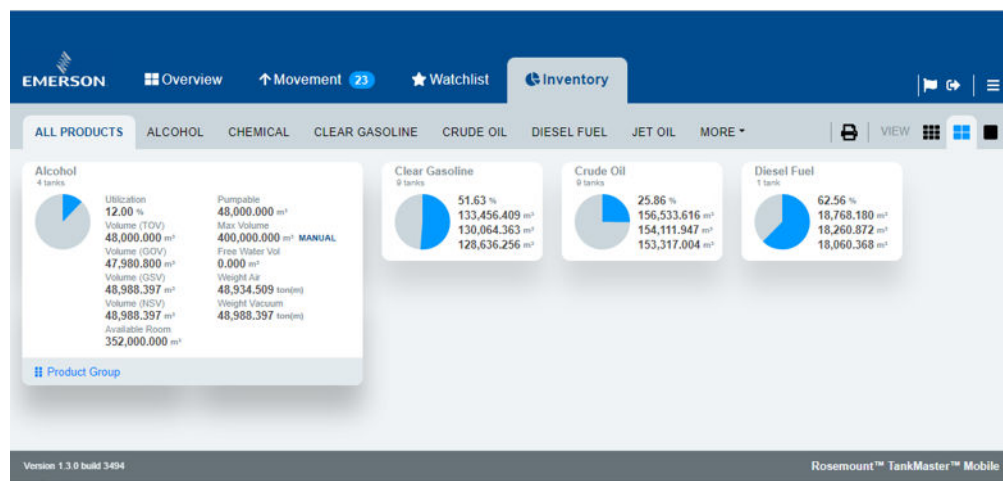

Figure 5-3: Tank Inventory View

You may see more inventory data for a specific product group by clicking its tank card. Then an expanded view appears with more data for the selected product group.

The **Product Group** option at the bottom of the card provides a shortcut to the inventory view with tanks for the selected product group. It's the same view that opens when selecting the inventory menu option for the selected product group.

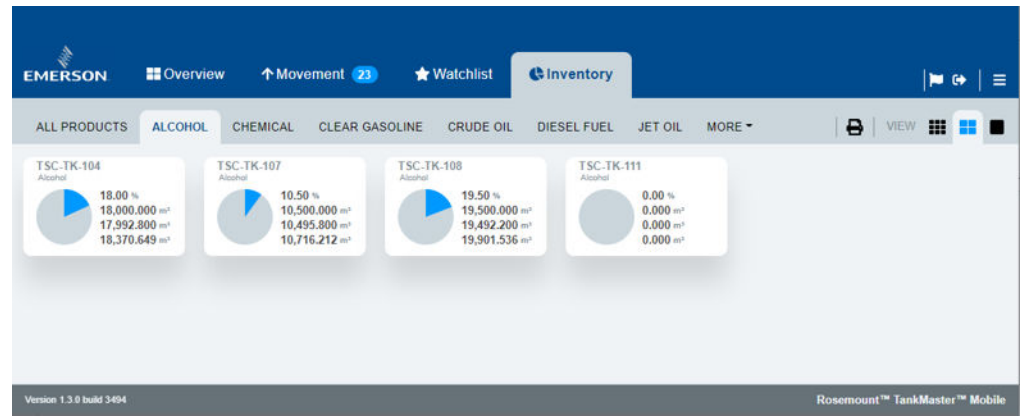

Figure 5-4: Tank Inventory Expanded View

Inventory view of tanks grouped by product

You may select a product to view all the tanks in that particular product group.

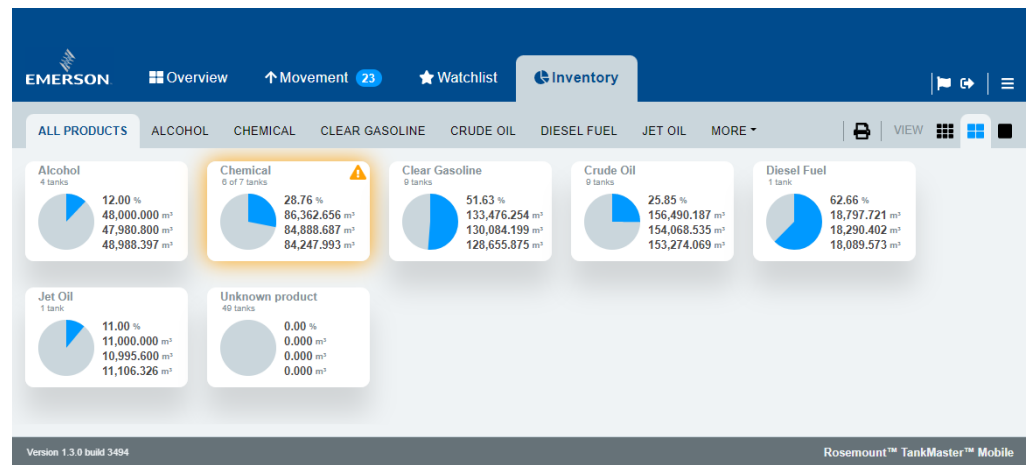

Figure 5-5: Tank Inventory for a Single Product Group

Warnings

Missing inventory data for one or more tanks, is indicated with a warning symbol. An excluded tank may have one or more "BAD" parameter values. In the upper left-hand corner you can see the number of tanks that are included in the calculated sum for each variable. You can view more information in an expanded view of the excluded tank by opening the product group view of the tank.

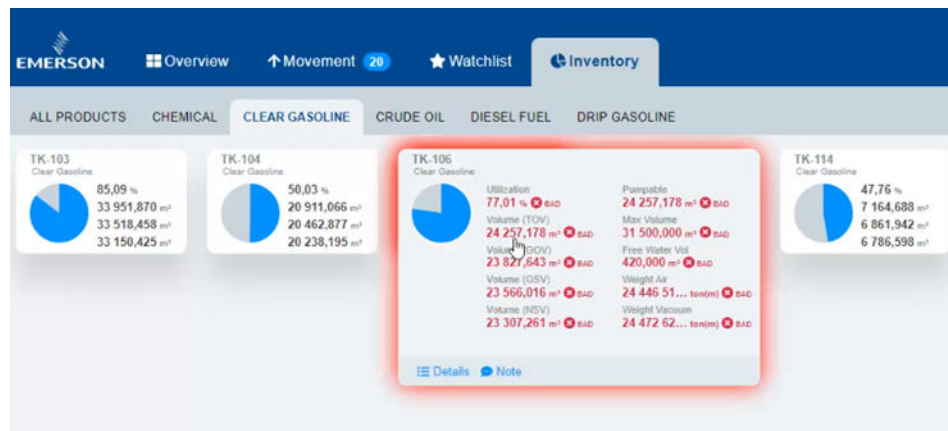

Figure 5-6: Product Group with Warning

Tank with bad data

You may open a tank group that contains a tank with warnings to find out more. Select the inventory card to open an expanded view with more information on which tank variables that don't show correct data.

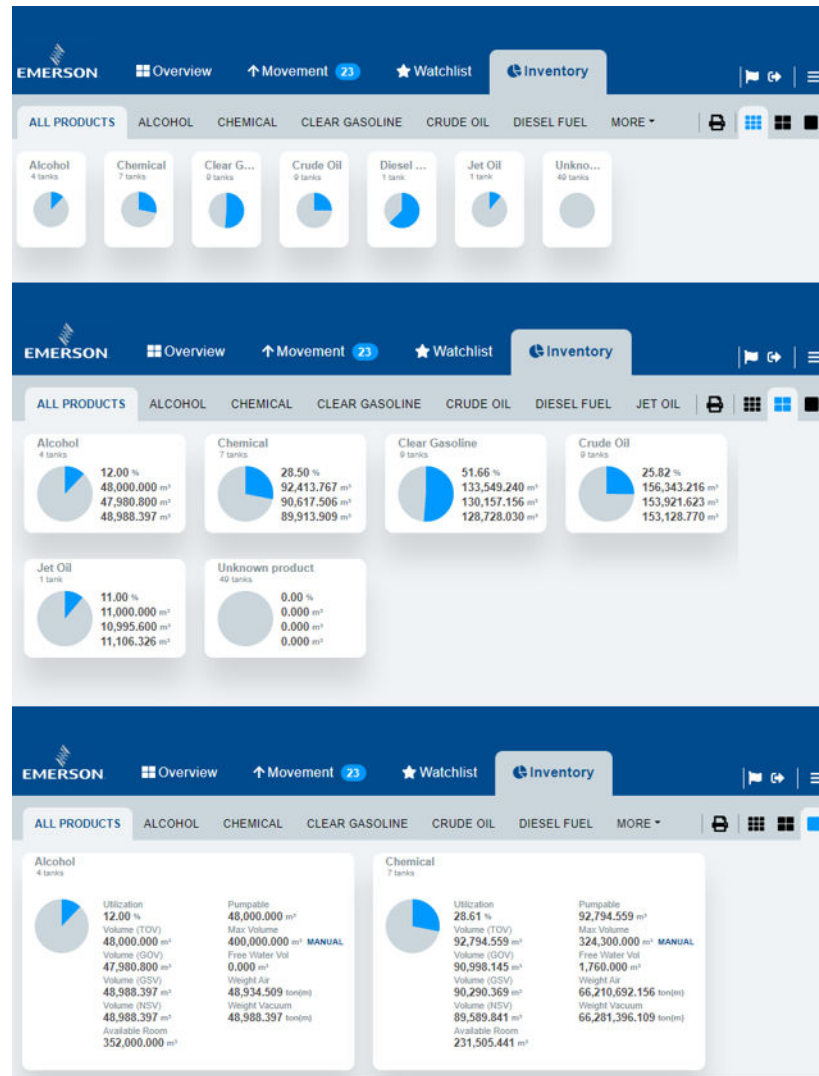

Figure 5-7: Tank with bad values

Inventory cards of various size

All inventory card sizes can be used for **Inventory** in the same way as for the **Overview** presentation.

6 Reports

This section presents how to set up and view reports.

The **Reports** function allows you create reports including the desired tanks and tank variables. Multiple options are available for schedules and distribution.

The basic configuration categories include:

- General** Lets you setup name and description.
- Schedule** Lets you setup daily, weekly, or monthly reports as well as creating reports on demand.
- Distribution** Offers multiple options for sending out reports such as email, save to disk, and printout.
- Tanks** Lets you select the particular tanks to include in the report.
- Variables** Lets you select the particular tank variables to display in columns.

6.1 Create a report

Reports that you create will be available to all users in your user group.

Prerequisites

Ensure that the Reports feature is activated for your user group.

Procedure

1. In TankMaster Mobile, select the **Reports** tab.
2. Click the **Reports**  icon.

Note

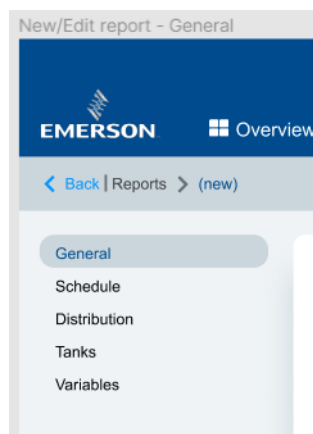

The Edit  button lets you edit existing reports.

3. Specify the report options.

On the left-hand side you will find options such as **General**, **Schedule**, **Distribution**, **Tanks**, and **Variables** that you need to setup for a complete report.

Once a report is created and saved it can be used as is, or you may return later to modify these settings if needed.

Related information

[Configure available features for user group](#)

[Administration mode](#)

6.2 General settings

The **Reports General** option lets you specify basic information for report that will be available for your user group.

Enter the desired **name** of the report.

An optional **description** of the report may be added.

Specify the **maximum number** of reports to be saved. When this number is reached, reports will be deleted starting with the oldest. 500 reports is the maximum possible number of reports.

6.3 Reports schedule

Depending on available options for your TankMaster Mobile license, you can setup reports for various distribution schedules.

Figure 6-1: Report Publication Schedule

The screenshot shows the EMERSON Reports interface. The top navigation bar includes 'EMERSON', 'Overview', 'Movement 10', 'Watchlist', 'Inventory', and 'Reports'. Below this is a 'Back | Add Report' link. The main content area is divided into a left sidebar with 'General', 'Schedule', 'Distribution', 'Tanks', and 'Variables' sections. The 'Schedule' section is active, showing a 'SCHEDULE' form with 'Publication Schedule' options: 'On demand (only)' (selected), 'Every day at 00:00', 'Every week on Monday at 00:00', and 'Every month on day 1 at 00:00'. A note at the bottom states: 'Note: To schedule reports to publish on the last day of each month, select 'Every month on day 31''.

On demand

Reports can be published on demand according to the specified distribution methods. This is the only option available for a **standard** license.

Scheduled reports

Various publication options are available for **premium** license. A report can be setup for daily, weekly, or monthly publishing. You may setup multiple reports for daily, weekly, and monthly publishing.

Reports can be scheduled to automatically publish on the last day of each month. By selecting **Every month on day 31**, the report will be published the last day of the month regardless of the number of days in a particular month.

6.4 Reports distribution

The **Reports Distribution** option lets you setup various scheduled reports options for members of the user group. You may select multiple distribution options if required.

Figure 6-2: Reports Distribution

Send by email

The report distribution option lets you setup the report for distribution via email. Choose the desired option:

- To all users in the user group
- To specific email addresses for users in the user group

You may send the report in the following formats:

- PDF
- CSV
- PDF and CSV

Note

The **Send by email** option requires that an email server is setup for Simple Mail Transfer Protocol (SMTP) by a system administrator.

Save to disk

This option lets you save reports to disk at the specified location. Available locations must be configured by using the **TankMaster Administration Utility** on the server machine.

The **Overwrite previous report** option ensures that only the last report will be saved. It facilitates locating the latest report since the same file name is used each time a new report is saved.

In case you wish to save previous reports, the **Overwrite** option should not be used. Then each report will be saved with a unique file name.

Reports can be saved in the following formats:

- PDF
 - CSV
 - PDF and CSV
-

Note

Local system user on the TankMaster Mobile server must have access to appropriate **Folder sharing** setup in order to save reports to disk.

Print

Reports in pdf formats can be printed. Available printers must be configured by using the **TankMaster Administration Utility** on the server machine.

Related information

[Email server configuration](#)

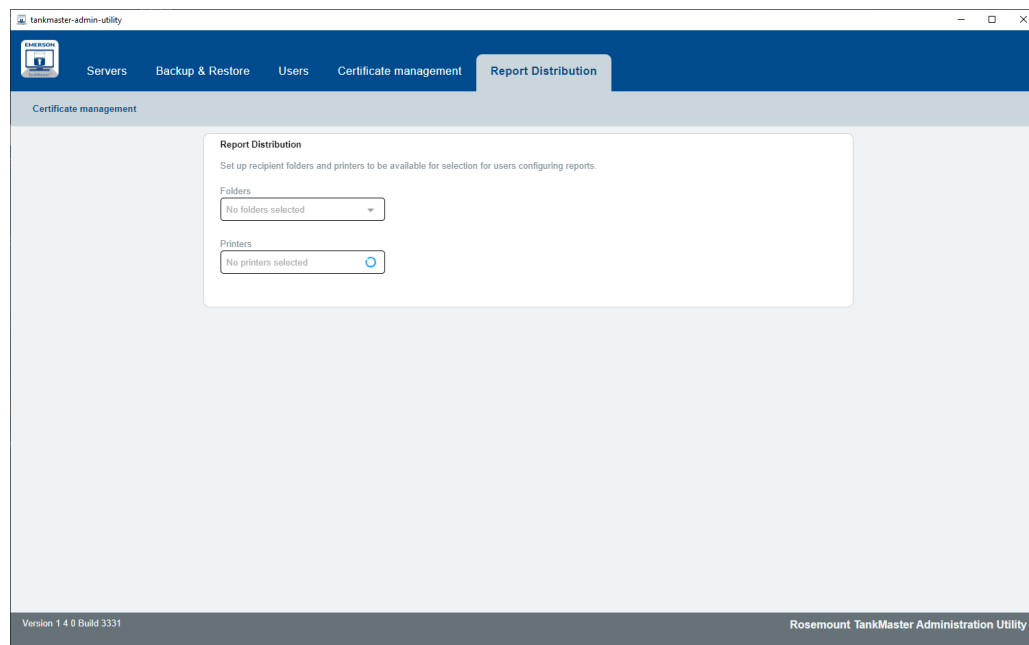

6.4.1 Report distribution setup

The **Report Distribution** option in **TankMaster Administration Utility** lets you setup folders and printers to be available for report distribution.

Folders and printers setup in this dialog will be available to users when configuring reports:

- **Folders** will be available in the drop-down list for **Save to disk**.
- **Printers** will be available in the drop-down list for **Send to printer**.

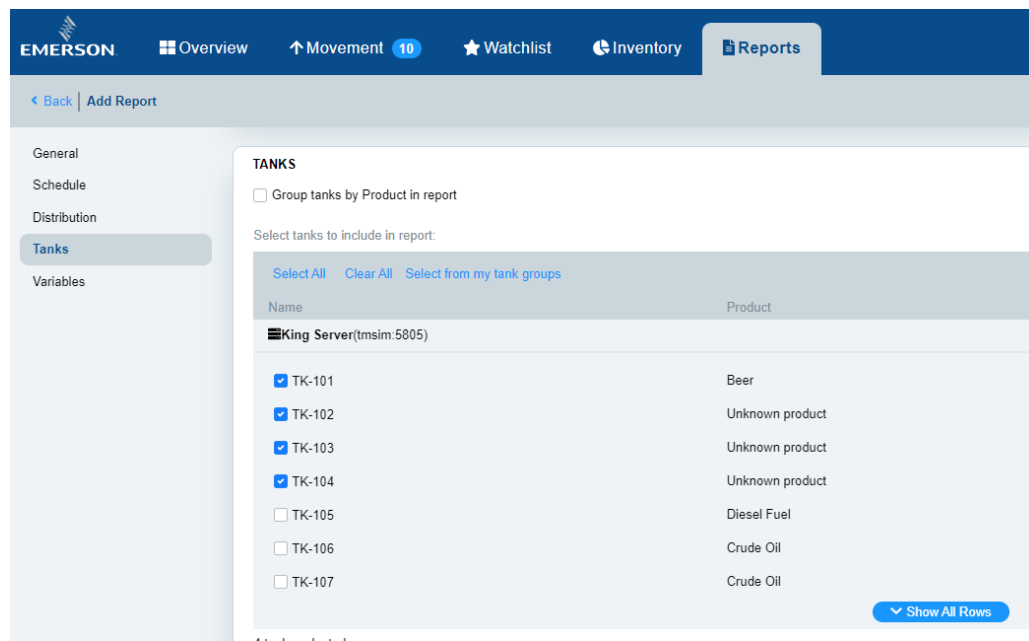

Figure 6-3: Report Distribution folder and printer setup

6.5 Tanks

The report **Tanks** option lets you setup the desired tanks for the report.

Figure 6-4: Add Tanks to the Report

Select the desired tanks for the report. You may select all tanks or just a few.

The **Select from my tank groups** option allows you select one or several tank groups. That option lets you select multiple tanks with one click. You will still be able to exclude tanks that you don't like to include in the report.

Group tanks by product in report

This feature presents tanks in groups based on product, and shows a summarized (aggregated) total per product for applicable products.

6.6 Variables

The reports **Variables** option lets you setup the desired tank variables to include in the report.

Figure 6-5: Tank Variables for a Report

The screenshot shows the EMERSON Reports interface. The top navigation bar includes 'EMERSON', 'Overview', 'Movement 10', 'Watchlist', 'Inventory', and 'Reports'. The left sidebar has options for 'General', 'Schedule', 'Distribution', 'Tanks', and 'Variables'. The main content area is titled 'VARIABLES' and contains the following text and table:

Select variable to display for each position:

! Δ Indicates that the value for the variable is calculated from previous report generated report.

Buttons: Edit, ↑ Move Up, ↓ Move Down, Select variable from template

Position	Variable	Aggregable	
1	Tank Name		
2	Product		
3	Level		
4	Average Temperature		
5	Net Standard Volume (NSV)	✓	
6	Reference Density		
7	(none)		
8	(none)		

Select variables

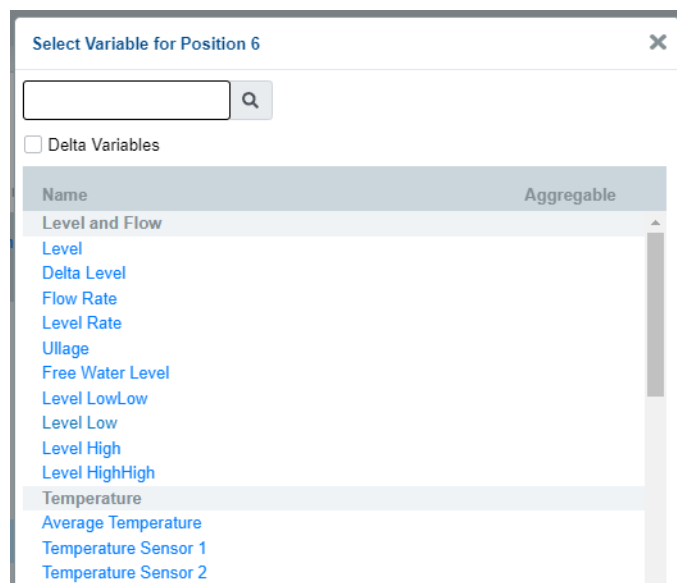

On each position you may use the **Edit** button to select the desired tank variables.

Aggregable means that for this variable the total sum of all tanks will be presented in the report in addition to individual tank values.

Note

The **Aggregable** option requires tanks to be grouped by product. It can be enabled under **Reports** → **Tanks**.

Figure 6-6: Select Tank Variable

Delta Variables lets you add the difference of a variable between the last two reports.

Default variables

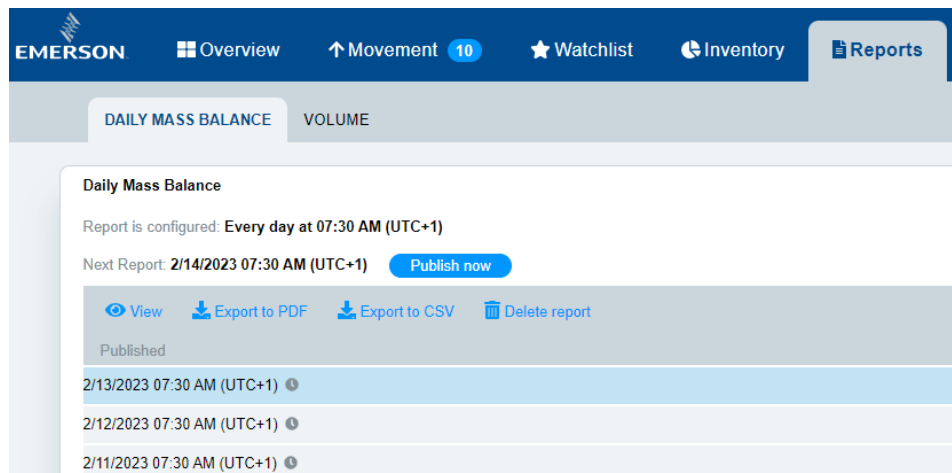

The **Select Variable from Template** option allows you to select one of the available standard **Mass Balance Report** or **Log Report**. The default reports have pre-selected setups of variables. However, these default setups can be modified to your own preferences by using the Edit  button.

6.7 View and publish reports

There are multiple options to view reports.

Procedure

1. In TankMaster Mobile, select the **Reports** tab.
2. Select one of the report types.
Standard reports such as Mass Balance or Log Report may appear, as well as custom reports added to your TankMaster Mobile server.
3. Select a report in the current list, or select **Publish now** to instantly create a new report.
Any available report in the list may be selected.
Publishing options such as **View**, **Export to PDF**, and **Export to CSV** will be enabled once a report is selected.

The **Report is configured** field shows the current report schedule. For unscheduled reports this field shows **On Demand Only**.

The **Next Report** field shows when next scheduled report will be published.

Note

Missing tank measurement data will be displayed with hyphens (-).

Note

Reports will always be generated with the most recent data available. Measurements are not used if they are older than 10 minutes.

4. For the selected report, choose one of the options:

Publish option	Description
View	The selected report will open in the web browser.
Export to PDF	The selected report will be downloaded as a PDF file.
Export to CSV	The selected report will be downloaded as a CSV file.

5. In case the report was exported as a file, use the appropriate application to view the report.

7 Translations

This section presents how to manage translations for the Rosemount TankMaster™ Mobile application web interface.

Managing translations for TankMaster Mobile is a straight-forward process. There are two ways to setup translated menus for TankMaster Mobile:

- Download **existing translations** from the [TankMaster Service Center](#).
- Download an **English source file** from the [TankMaster Service Center](#) and create desired translations.
The English source file is in Microsoft® Excel format and contains items which can be edited to provide the desired language. The translated file can be exported to a file format supported by the TankMaster Mobile application. The translated file can be used even if not all of the available items are translated.

Once translations are available:

- Load the desired language into the TankMaster Mobile application. Then the translation will be available for the web browser's language settings.
- Configure the web browser for the desired language.

Files can be downloaded from the TankMaster.Rosemount.com/ServiceCenter web site.

Related information

[TankMaster Service Center](#)
[Activate developer tab in Microsoft Excel](#)
[Translate menus in TankMaster Mobile](#)
[Add translations to TankMaster Mobile](#)
[Select web browser language](#)

7.1 Download translation files

Translations can be downloaded from the TankMaster Service Center.

Procedure

1. Navigate to TankMaster.Rosemount.com/ServiceCenter and sign in to your account or create a new account if you are a new user.

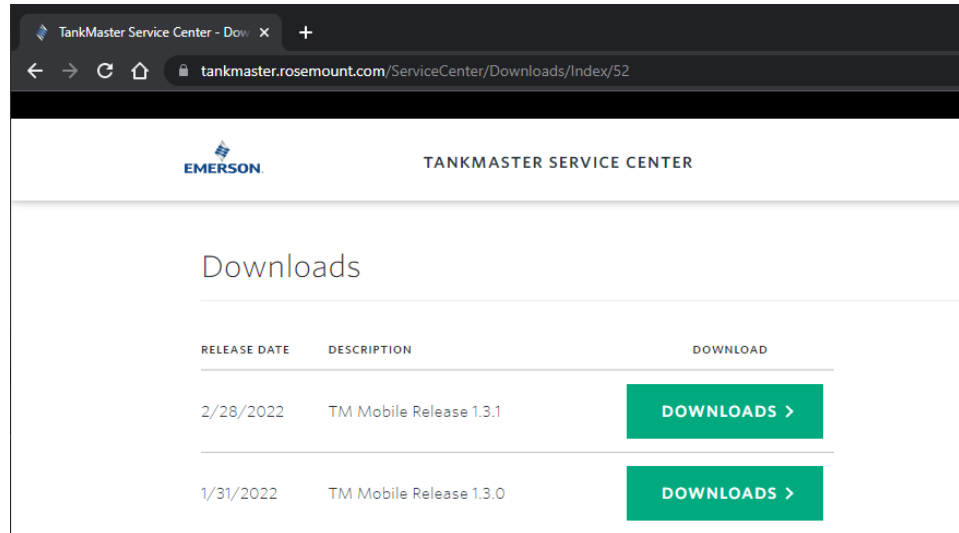

The screenshot shows two columns: 'TankMaster Service Center Sign In' and 'New User'. The sign-in column has fields for 'EMAIL ADDRESS' (with a placeholder 'email@company.com') and 'PASSWORD', followed by a 'SIGN IN >' button and a link for 'Forgot your password?'. The 'New User' column has a 'CREATE ACCOUNT >' button and lists benefits: 'License administration' and 'Software downloads'.

2. Open the **Actions** drop-down list for the desired active license and select **Downloads**.

The screenshot shows the 'My licenses' page in the TankMaster Service Center. It features a table with columns: SERIAL NO, SOFTWARE UPDATE SUBSCRIPTION END DATE, LICENSE STATUS, LICENSE INFORMATION, and ACTIONS. Two licenses are listed, both with a status of 'Active'. The 'Actions' dropdown menu for the first license is open, showing options: Re-Activate, Transfer, Renew software update period, Upgrade options, Activation Key, and Downloads (highlighted with a mouse cursor).

SERIAL NO	SOFTWARE UPDATE SUBSCRIPTION END DATE	LICENSE STATUS	LICENSE INFORMATION	ACTIONS
100010	2026-05-06	Active	Active Keys Product Key: 9F2F-FB-72-32-VG-3RGDCP6 System Key: 9F2F-20220117-9JK97G4-CBTCJXQ-MF3GD7F 1 Product Key Registered Product Key: 9F2F-FB-72-32-VG-3RGDCP6 (Date created: 4/15/2021) Country of Use: Sweden Demo Server in RTR Lab Edit comment	ACTIONS Re-Activate Transfer Renew software update period Upgrade options Activation Key Downloads
100008	2023-02-21	Active	Active Keys Product Key: 9F2C-FB-F-8-VG-MD6HMF8 System Key: 9F2C-20220221-9FDMFGR-888PT7T-DX2CJ9P 1 Product Key Registered Product Key: 9F2C-FB-F-8-VG-MD6HMF8 (Date created: 4/15/2021) Country of Use: Sweden Add comment	

3. Select **Downloads** for the desired TankMaster Mobile release.

4. Select and download the desired translation file.
Existing translations or english source file to be used for your own translation projects.

7.2 Create new translation files

This section is a brief introduction how to create new translations for TankMaster Mobile.

Procedure

1. Download the source file from the TankMaster.Rosemount.com/ServiceCenter web site.
The english source file is in Microsoft® Excel format and contains all menus. Each item can be edited to provide the desired language.
2. Open the english source file and translate the various items to the desired language.

7.2.1 Activate developer tab in Microsoft® Excel

This is a description of how to enable the **Developer** option in Microsoft® Excel.

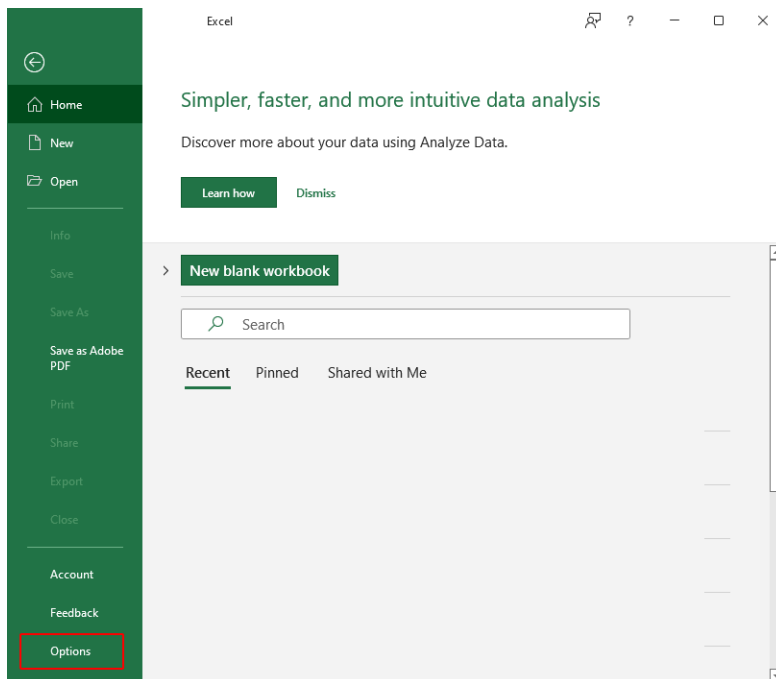

The **Developer** option lets you export a translated Excel file into a format supported by TankMaster Mobile in order to activate desired language options.

Procedure

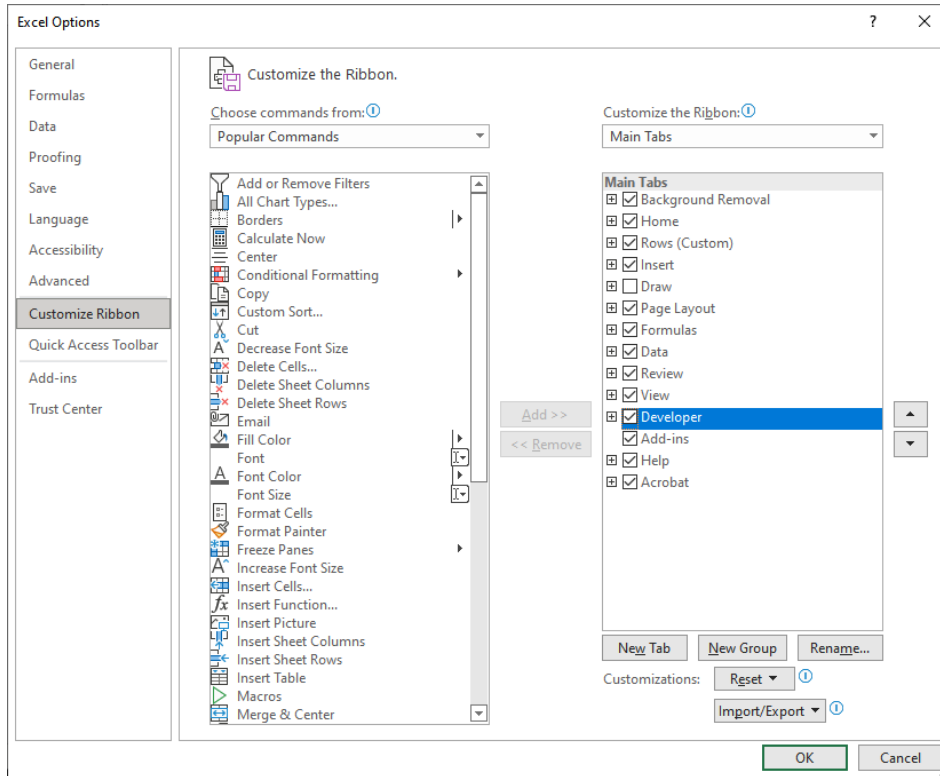

1. Open the **Microsoft Excel** program.
2. Select **File**,

and then **Options**:

3. Select **Customize Ribbon**.

4. Under **Main Tabs** on the right-hand side, select the **Developer** check box.
5. Select **OK**.

7.2.2 Translate menus in TankMaster™ Mobile

Prerequisites

Ensure that **Developer** tab is activated in Microsoft® Excel.

Procedure

1. Open the Excel file with TankMaster Mobile's English source text.
2. Under **Language Key**, enter the standard language code according to ISO 639-1.
3. Edit the file by filling in the **Translation** column which appears next to the English source text column.

	A	B	C
1	Language key	Language name	
2	sv	Swedish	
3			
4	Key	Translation	English original text
5	Menu_Report	Rappporter	Reports
6	Menu_Batch	Batch	Batch
7	Menu_CompanyInfo	Företags info	Company Information
8	Menu_Licensing	Licenshantering	Licensing

4. Once finished, save the file by exporting it to **XML** format:
 - a) Select menu option **Developer**.
 - b) Select the **Export** button.

- c) Select a folder, type the desired file name, and make sure that the file is saved in **XML** format.

- d) Select the **Export** button.

7.3 Add translations to TankMaster™ Mobile

This is description of how to add translations into TankMaster Mobile to make them available for web browser language settings.

Prerequisites

Ensure that the translation file is available in **XML** format.

Note

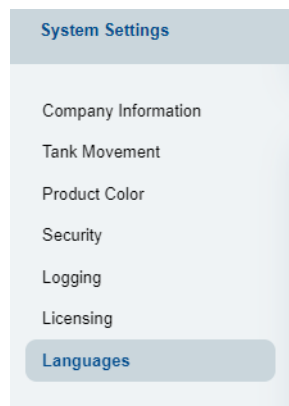

Languages can only be added by administrators.

Procedure

1. Open the TankMaster Mobile web page.
2. Sign in as **administrator**.
3. Open the **Settings** tab.

4. In the menu on the left-hand side, select **Languages** and scroll down to the **Languages** pane.

5. Select the desired language:
 - a) In the **Languages** pane, select the **Select File** button.

- b) Browse to the folder where the desired language file is stored.
- c) Select the file and click **OK**.

Need help?

In case you don't find the desired language, check that:

- the translation file is available in **XML** format.
- the file has a tab with the correct **language key** for the desired language

Postrequisites

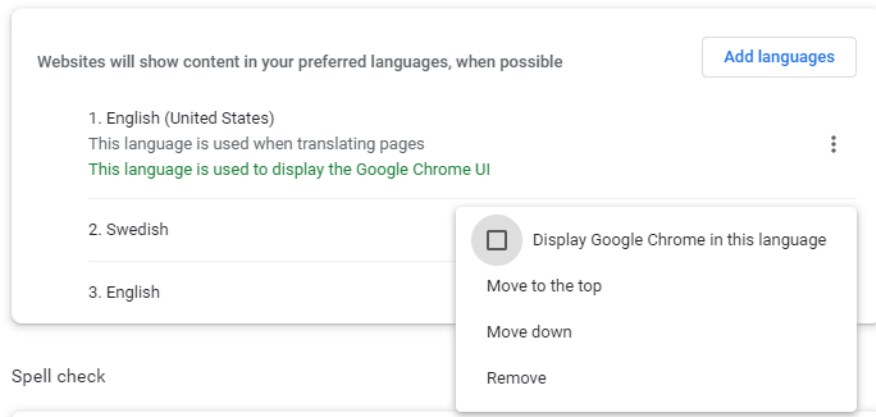

Restart the TankMaster Mobile server to ensure that languages are properly installed. Alternatively, you may restart the **Identity Server** from the **TankMaster Administration Utility**.

7.4 Select web browser language

Procedure

1. Open the Chrome web browser.
2. Open **Settings** → **Languages**.
3. Select the desired language by selecting check box **Display Google Chrome in this language**.

Preferred languages

Now TankMaster Mobile will be displayed in the selected language.

Note

The selected web browser language will be used for this computer. Other users may select other languages for TankMaster Mobile on their computers.

Need help?

In case TankMaster Mobile is not displayed in the desired language, check that the language file is loaded.

8 System administration

8.1 Administration mode

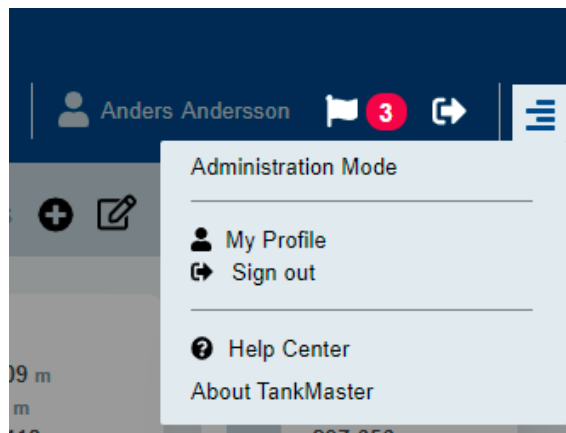

In administration mode, you can manage system settings such as connecting to tank servers and application servers. In addition to that, administration mode allows you to create user accounts and user groups as well as manage security settings and various other system related tasks.

8.1.1 Enter administration mode

To enter **Administration Mode**:

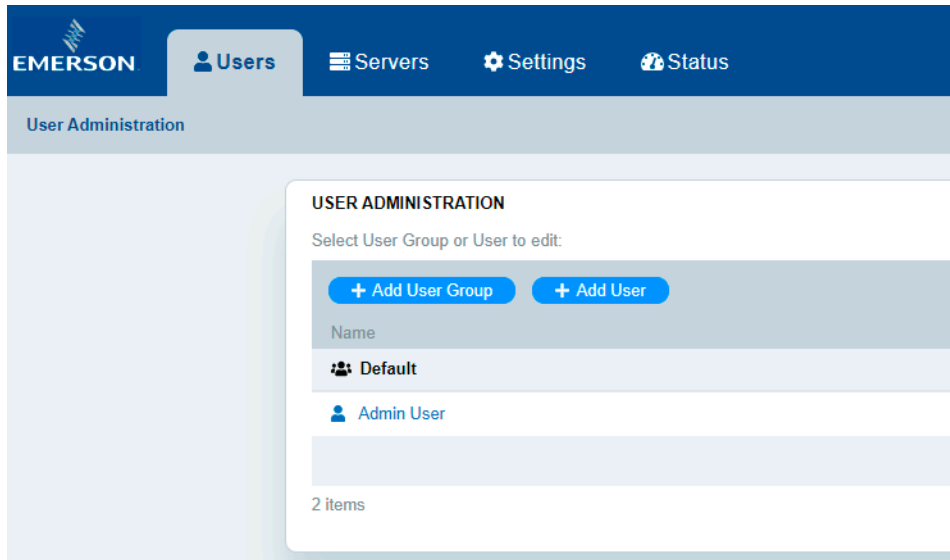

Procedure

1. On the right-hand side of the menu bar, click **Administration Mode**.

2. Enter your password.

The **Users** menu will open automatically in case a tank server is available. Otherwise the **Servers** menu will open.

3. Configure user accounts, servers, or system settings.
4. Exit Administration mode when finished.

Postrequisites

Verify that new users, user groups, tank servers, and application servers are accessible.

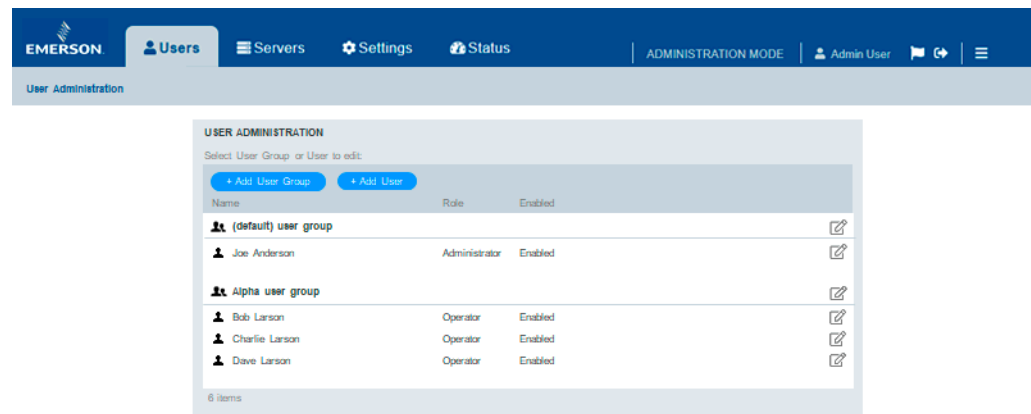

8.2 User administration

This section provides information on adding users and user groups. It also covers how to specify access to tanks and variables for different users.

A user group can be given access to certain tanks and tank groups. In addition to that, a selection of specific features such as Movement View, Reports, Tank Details, and Tank Notes can be made available for the group.

For each user group a set of variables such as Level, Average Temperature, and more can be made available.

Figure 8-1: Adding and Editing User Groups

8.2.1 Add user groups and users

This section describes how to add and edit user groups and users.

A user group can be given access to tanks, tank groups, and a selection of specific features such as Movement View, Reports, Tank Details, and Tank Notes. Also, a set of variables such as Level, Average Temperature, and more can be made available. Tanks and variables must be mapped to the user group in order to be available in tank cards.

Related information

[Tank cards](#)

Configure user groups and users

Prerequisites

Make sure that you are logged in as **Administrator**.

Procedure

1. Select the **Users** menu.
2. Click the **Add User Group** or the **Add User** button.
3. Select the **General** option.
4. Enter the required information.

For a **user group** you need to configure the following:

- Name
- Tanks
- Variables
- Features such as Movement view, Reports, Tank details, and Tank Notes.

For **users** you need to configure:

- Name and contact information
- Role (Admin or Operator)
- User group
- How long this user account will be enabled
- Register device

5. Click **Save** when finished.

Related information

[Enter administration mode](#)

8.2.2 Map tanks and tank data to a user group

This section describes how to map tanks and parameters to be accessible for a user group.

Related information

Map tanks to a user group

This description shows how to map tanks to a user group.

Prerequisites

Make sure that you are logged in as **Administrator**.

Procedure

1. Open the **Users** menu.
2. Select a user group.
3. Click the **Edit** button.
4. Select the **Tanks** option.
The **Tanks** option lets you select the desired tanks to be available for the current user group.
5. Select the desired tanks to be accessible for the user group.
6. Click **Save**.

Map tank data to a user group

This description shows how to map tank data to a user group.

Prerequisites

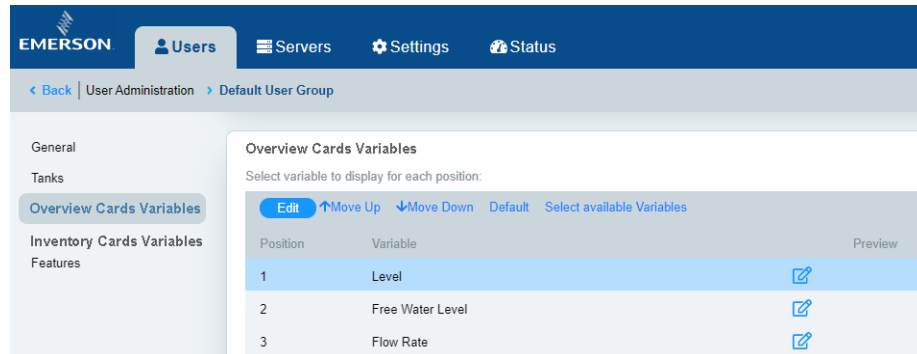

Make sure that you are logged in as **Administrator**.

Procedure

1. Open the **Users** menu.
2. Select a user group.
3. Click the **Edit** button.

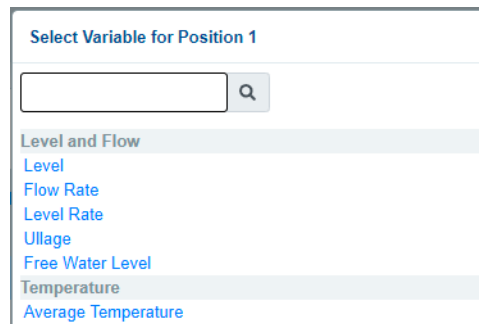

4. Select the desired option, for example **Overview Cards Variables**. Now you may specify up to 12 tank variables to be used for tank card presentations.

The **Overview Cards Variables** option includes variables such as Level, Free Water Level, Flow Rate, and more.

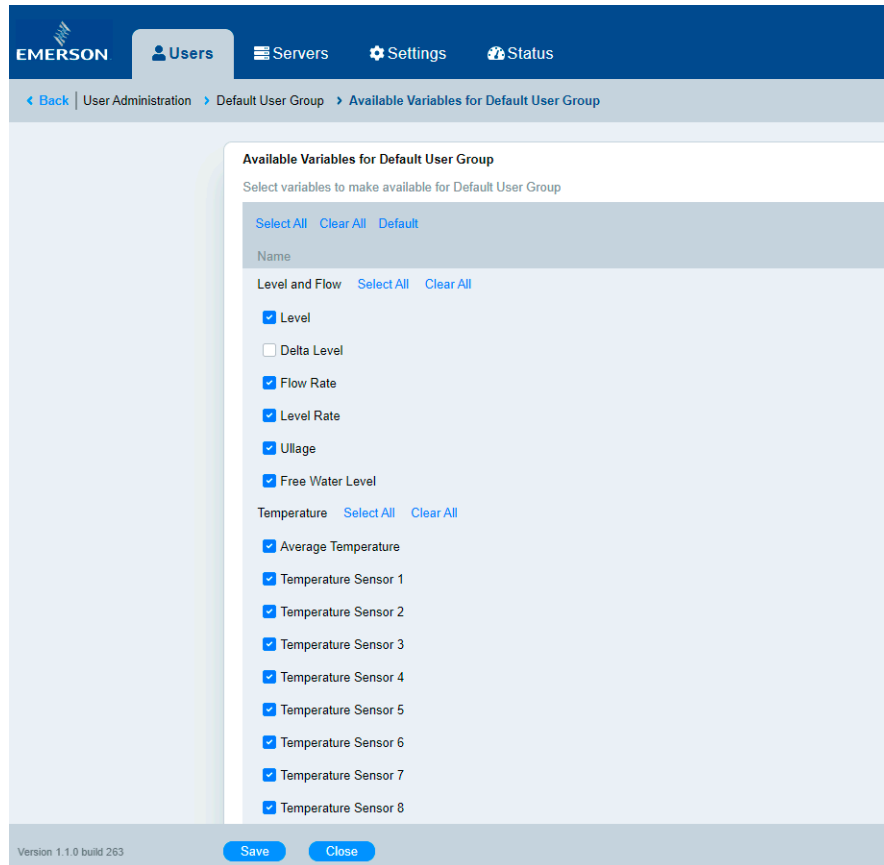

The **Tanks** option lets you select tanks to be available for the current user group.

5. For each row there is an **Edit** icon on the right-hand side. Select the edit icon to find a complete list of available variables. For each position 1 -12 you may select the desired variable from this list.

6. Configure the desired variables to be accessible for the user group. Up to 12 variables can be configured.
7. Use **Move Up** or **Move Down** to put a selected variable in the desired position.

- Optional: Click **Select available variables** in case you would like to limit or extend the list of variables that can be selected for each position.

- Click **Save** once you are finished.

8.2.3 Configure inventory variables for user group

Follow this procedure to map inventory data to a user group.

Prerequisites

Make sure that you are logged in as **Administrator**.

Procedure

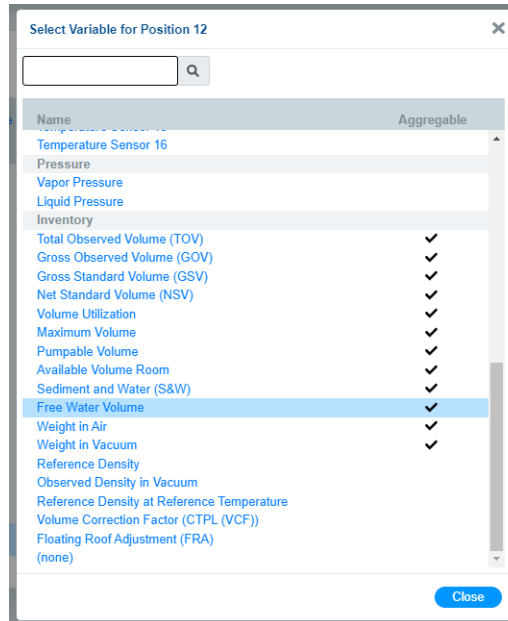

1. Open the **Users** menu.
2. Select the desired user group.
3. Click the **Edit** button.

4. Select the **Inventory Cards Variables** option.
Now you may specify up to 12 inventory card variables.

The **Inventory Cards Variables** option lets you select the desired inventory variables for volume calculations. This includes variables such as Total Observed Volume (TOV), Gross Observed Volume (GOV), Net Standard Volume (NSV), and many more.

5. For each row there is an **Edit** icon on the right-hand side. Select the edit icon to find a complete list of available variables. For each position 1 -12 you may select the desired variable from the list.

6. Configure the desired inventory variables to be accessible for the user group. Up to 12 variables can be configured.
7. Use **Move Up** or **Move Down** to put a selected variable in the desired position.
8. Optional: Click **Select available variables** in case you would like to limit or extend the list of variables that can be selected for each position.
9. Click **Save** once you are finished.

8.2.4 Configure available features for user group

Follow this procedure to map features to a user group.

Prerequisites

Make sure that you are logged in as **Administrator**.

Procedure

1. Open the **Users** menu.
2. Select the desired user group.
3. Click the **Edit** button.
4. Select the **Features** option.
5. Select the desired features to be available for this user group.

Note

In order to make features available for user groups they need to be made available in the Application Server as well⁽²⁾.

FEATURES

Select features to make available to this user group

Note: User access to feature is also controlled by Application Server configuration. Users have access to a feature when selected in list below and corresponding feature is also selected for the Application Server.

Select All Clear All

Feature	Description
<input checked="" type="checkbox"/> Movement View	Access to view showing tanks with movement.
<input checked="" type="checkbox"/> Inventory View	Access to view showing inventory by product.
<input checked="" type="checkbox"/> Report View	Ability to generate and view reports of tanks.
<input checked="" type="checkbox"/> Tank Details	Access to view showing all tank variables.
<input checked="" type="checkbox"/> Tank Notes	Ability to set and view notes for tanks.
<input checked="" type="checkbox"/> Print Out	Ability to print out current view on demand.

6 features selected

Save Close

6. Click **Save** once you are finished.

Related information

[Administration mode](#)

⁽²⁾ See *Server management in the Rosemount TankMaster Mobile Installation Manual* for more information on how to edit an application server.

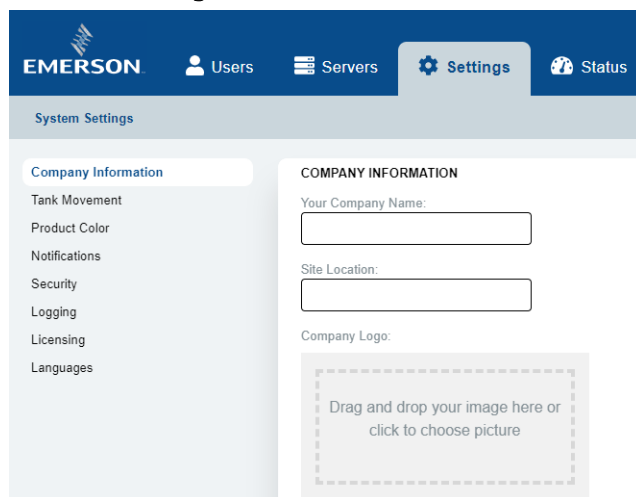

8.3 System settings

This section describes how to configure system settings, servers, and user accounts.

8.3.1 System settings menu

Procedure

1. Enter **Administration mode**.
2. Select the **Settings** menu.

The screenshot displays the Emerson System Settings web interface. At the top, there is a dark blue navigation bar with the Emerson logo and icons for Users, Servers, Settings (highlighted), and Status. Below this is a light gray header for 'System Settings'. A left-hand menu lists various settings categories: Company Information (highlighted), Tank Movement, Product Color, Notifications, Security, Logging, Licensing, and Languages. The main content area is titled 'COMPANY INFORMATION' and contains three input fields: 'Your Company Name', 'Site Location', and 'Company Logo'. The 'Company Logo' field is a dashed box with the text 'Drag and drop your image here or click to choose picture'.

3. In the left-hand menu bar, select a menu option and do the required configuration.
4. Click **Save** when finished.

Related information

[Enter administration mode](#)

8.3.2 Company information

You may specify name, logotype, and contact information for your company. This information will appear on the sign in page.

Figure 8-2: Company Information

The screenshot shows the 'System Settings' interface. On the left is a sidebar with the following menu items: Company Information (highlighted), Tank Movement, Product Color, Notifications, Security, Logging, Licensing, and Languages. The main content area is titled 'COMPANY INFORMATION' and contains the following fields and options:

- Your Company Name:
- Site Location:
- Company Logo: A dashed box containing the text 'Drag and drop your image here or click to choose picture'. Below it is a blue 'Browse' link.
- Support Message:
- Support Email:
- Support Phone Number:

Company information

Follow this procedure to add company information:

Procedure

1. Enter **Administration** mode.
2. Open the **Settings** menu.
3. Select **Company Information**.
4. Add the desired information.
5. You may upload a company logotype by drag and drop to the **Company Logo** frame. Standard file formats such as PNG and JPG are supported. Note that file size may not exceed **1 MB**.
6. Click **Save** once your are finished.

Related information

[Enter administration mode](#)

8.3.3 Tank movement limits

Movement is indicated when flow rate exceeds certain limits. Default values are automatically set unless you change to other limits.

Minor and **Major** limits for tank movement can be configured for each tank. Product movement is indicated in tank cards based on the specified limits.

You may return to default limits by selecting **Set all to Default**.

Figure 8-3: Tank Movement Limits

Name	Minor Limit	Major Limit
TK-100	100 m³/h	800 m³/h
TK-101	100 m³/h	800 m³/h
TK-102	100 m³/h	800 m³/h

Related information

[Tank movement](#)

Tank movement configuration

Follow this procedure to configure limits for tank movement presentation.

Procedure

1. Enter **Administration** mode.
2. Open the **Settings** menu.
3. Select **Tank Movement**.
4. Start by setting the desired **Measurement Unit**; m³/h, bbl/h etc.
5. Set the desired **Default Major Limit** and **Default Minor Limit**. You can use the default values to set the same movement limits for all tanks. They can also be used as a starting point before you specify limits for individual some tanks.
6. Click **Set all to Default** in case you like to use common limits for all tanks. You may also use this function to set a starting point before configuring individual movement limits.
7. Configure desired **Minor Limits** and **Major Limits** for individual tanks if desired. Individual limits will override default values.
8. Click **Save**.

8.3.4 Product color

The **Product Color** page lets you configure colors to facilitate tracking of different products. These colors will be used for presentation of tanks and products. You can configure product colors regardless of the current color configuration on the Tank Server.

Note

A product will disappear from the list in case the product name is changed in the Tank Server.

Figure 8-4: Product Colors

Product color configuration

You may specify a color for each product to be used in various bar graph presentations.

Procedure

1. Enter **Administration** mode.
2. Open the **Settings** menu.
3. Select **Product Color**.
4. Assign colors for the desired products.
5. Click **Save** once your are finished.

8.3.5 Security settings

The **Security** menu offers several options for security related configuration.

A number of security related settings can be configured:

- Number of failed sign in attempts
- Account lockout duration
- Password renewal interval
- Minimum password length
- Required password characters
- Sign out inactivity option and time period
- Device access - procedure to register new devices
- Email server configuration

Grant access for new devices

Each new device needs to be granted access to TankMaster Mobile.

Figure 8-5: Device Access

Device Access

Select procedure for how new devices are granted access to the system:

Granted by Administrator manually

Access needs to be granted for each new device (e.g. mobile phone) used to access the system.

There are three different options for registration of new devices:

- **Granted by user via email.**
The user automatically receives a code via email to register a new device.
- **Granted by administrator manually.**
The administrator must manually grant access for a new device.
- **Always granted.**
This option does not require any code or manual approval by administrator.

Configure security settings

This procedure describes how to configure security settings.

Procedure

1. Open TankMaster Mobile.
2. Sign in to **Administration mode**.
3. Open the **Settings** menu.
4. Select **Security**.

5. Configure the security settings as required.

SECURITY

Number of Failed Sign In Attempts Before Locking Account
5 attempts
User account is temporarily locked for a period of time after failing to sign in.

Account Lockout Duration (after failing to sign in)
5 minutes
User is provided new sign in attempts after

Password Renewal
 Password must be changed by user every
6 months
 Password never expires.

Minimum Password Length
8 characters
Passwords defined by users must at least
Note: All users must change their password

Required Password Characters
 Lower case character (like "a")
 Upper case character (like "B")
 Number (like "7")
 Special character (like "&" or "!")
Passwords defined by users must contain
Note: All users must change their password

Required Password Characters
 Lower case character (like "a")
 Upper case character (like "B")
 Number (like "7")
 Special character (like "&" or "!")
Passwords defined by users must contain
Note: All users must change their password

Sign Out User due to Inactivity
 User is signed out automatically after a period of inactivity:
60 minutes
 Never sign out user due to inactivity.

Require User Password due to Inactivity
 User is required to re-enter password after a period of inactivity:
20 minutes
 Never require password due to inactivity (not recommended).

Note: Inactivity options are not applicable for the Mobile Application.

Device Access
Select procedure for how new devices are granted access to the system:
Granted by Administrator manually
Access needs to be granted for each new device (e.g. mobile phone) used to access the system.

8.3.8 Connect to Tank Servers

This section describes how to connect to Tank Servers.

Related information

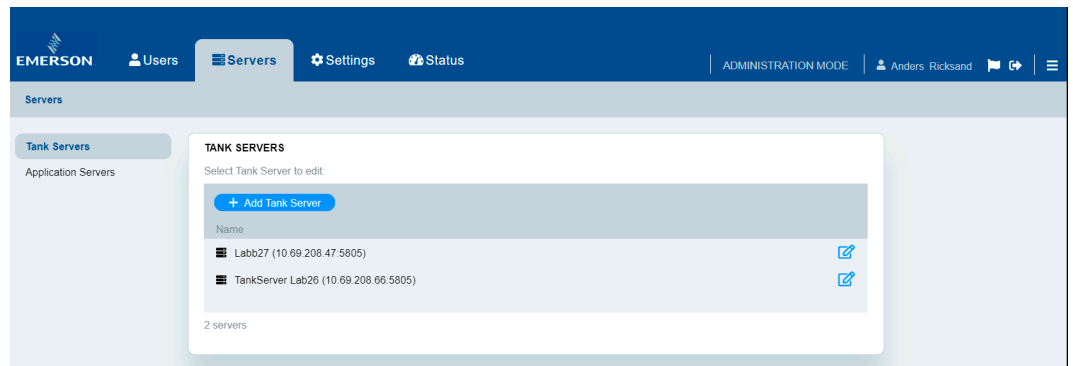

[Enter administration mode](#)

Connect to a Tank Server

Follow this procedure to connect to a tank server.

Procedure

1. Open TankMaster Mobile web application.
2. Sign in and enter **Administration mode**.
3. Open the **Servers** menu.
4. Select **Tank Servers**.
5. Click the **Add Tank Server** button.

6. Under **General** enter the required information for:
 - Tank Server name.
 - Description (optional)
 - Network location (IP address) of the Tank Server Connector machine
 - Port number. Default is 5805.
You can change to other port in case you need to align with site policies.
 - Tank Server connector key.
Use the key that was provided during installation of Tank Server Connector.
 - Server Alias (optional).
The Alias is used as prefix to tank names for this server.
Example: Alias "A-" for tank TK-101 results in tank name "A-TK-101".
It is recommended to leave server alias blank if only one Tank Server is connected.
7. Click **Save**.
8. Click **Close** to return to the **Servers** menu.

8.3.9 Email server configuration

Configure email server to enable TankMaster Mobile email communication.

Prerequisites

Ensure that appropriate SMTP parameters are available for configuration of TankMaster Mobile email server.

Procedure

1. Open TankMaster Mobile.
2. Sign in to **Administration mode**.
3. Open the **Settings** menu.
4. Select the **Security** option.
5. Scroll down and select **Configure email server**.

Require User Password due to Inactivity

User is required to re-enter password after a period of inactivity:

minutes

Never require password due to inactivity (not recommended).

Note: Inactivity options are not applicable for the Mobile Application.

Device Access

Select procedure for how new devices are granted access to the system:

Access needs to be granted for each new device (e.g. mobile phone) used to access the system.

[Configure email server](#)

6. Configure the email server with appropriate Simple Mail Transfer Protocol (SMTP) settings.

The screenshot shows the 'Email Server Settings' page in a web application. The page has a dark blue header with navigation links for 'Users', 'Servers', 'Settings', and 'Status'. The 'Settings' link is active. Below the header, there is a breadcrumb trail 'Settings > Email Server Settings'. The main content area is titled 'EMAIL SERVER SETTINGS' and contains the following fields and options:

- SMTP server address:** A text input field with an example value 'smtp.exampleserver.com' below it.
- SMTP Port:** A text input field with the value '25' and an example '*Example: 25, 465, 587*' below it.
- Authentication:** A section with two radio button options: 'Account on SMTP Server' (selected) and 'Not Required'. Under 'Account on SMTP Server', there are 'Username' and 'Password' text input fields.
- Encryption:** A section with two radio button options: 'Use Transport Layer Security (TLS/SSL) encryption' (selected) and 'No encryption (not secure)'.
- From Email:** A text input field with a note below it: 'Enter email address that Rosemount TankMaster Mobile system emails are sent from.'
- From Name:** A text input field with a note below it: 'Enter name that Rosemount TankMaster Mobile system emails are sent from.'

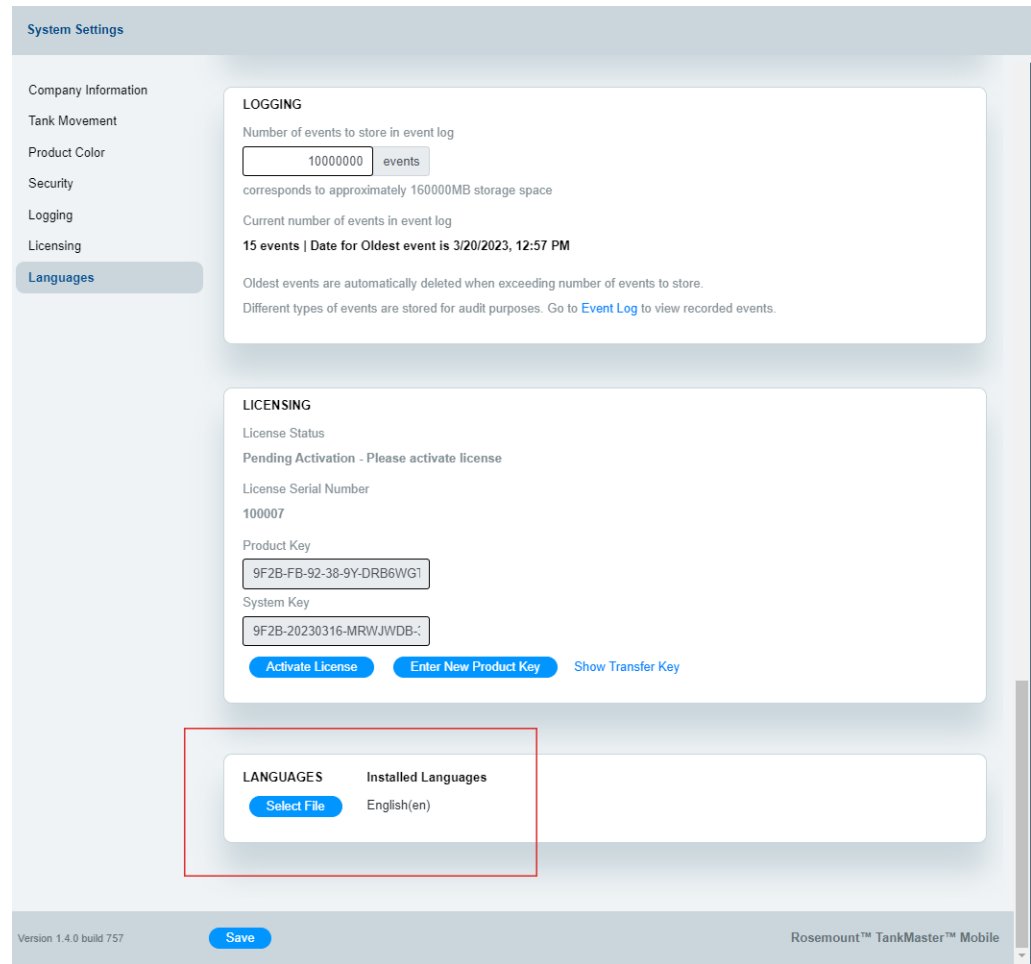

At the bottom of the form, there is a blue button labeled 'Send test email'.

8.3.10 Languages

The **Languages** option allows you to setup the TankMaster Mobile application for the preferred language.

A translation file must be available in **XML** format and include the desired language with correct language key.

9 User settings

This section presents options that are available under **My Profile**.

My Profile lets you edit your personal account information as well as change your password. You may also add tank groups, or edit existing tank groups.

9.1 Account

The **Account** page shows personal information for your TankMaster Mobile account.

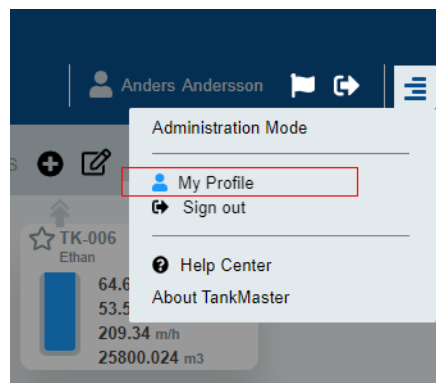

9.1.1 Configure account

The **Account** option allows you to change personal information for you account.

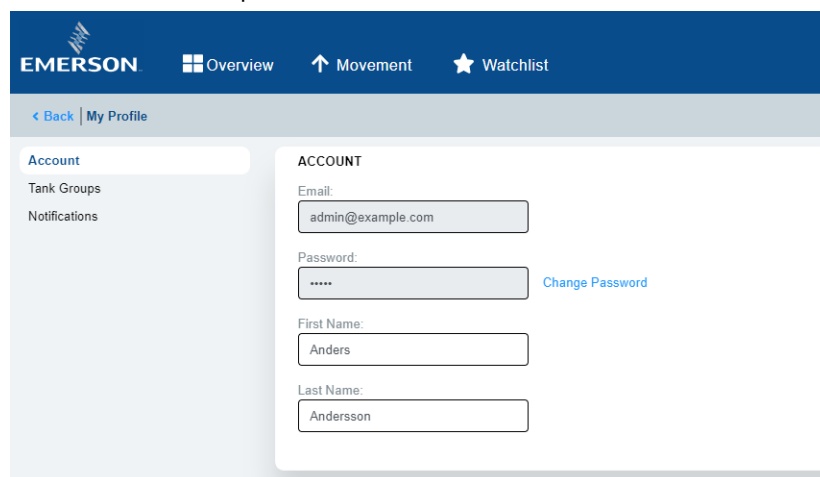

This procedure describes how to edit your **Account** settings.

Procedure

1. Navigate to the TankMaster Mobile web page and sign in.
2. Open the menu for **administration and user settings**.

3. Click **My Profile**.
4. Select the **Account** option.

5. When editing is finished, click the **Save** button.
6. Click the **Close** button to return to Overview.

9.2 Password

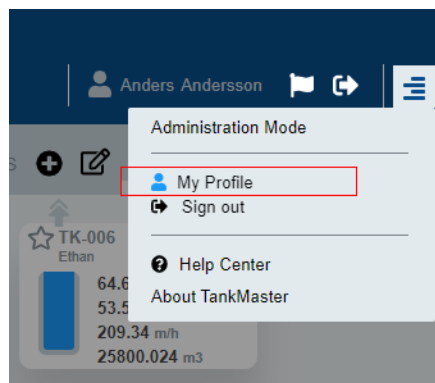

You can easily change password at any time on the **Accounts** page.

9.2.1 Change password

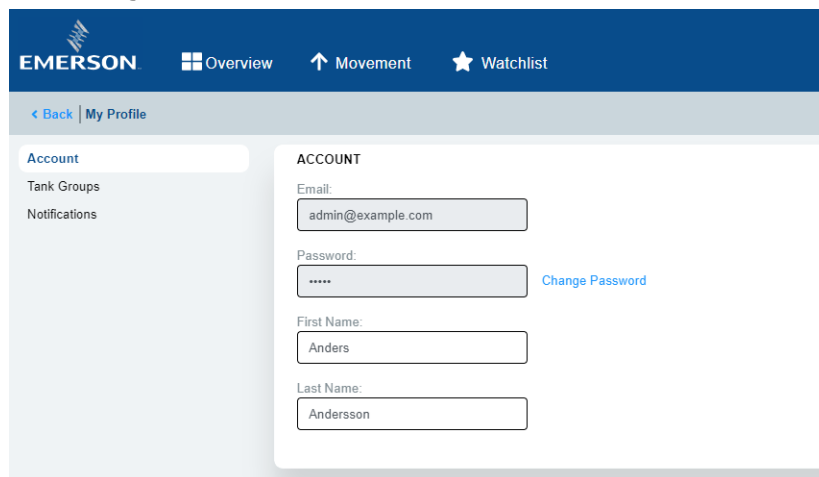

This procedure describes how to change **Password** for your account.

Procedure

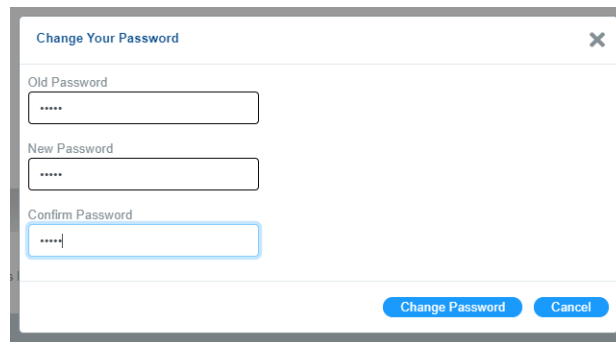

1. Navigate to the TankMaster Mobile web page and sign in.
2. Open the menu for **administration and user settings**.

3. Click **My Profile**.
4. Select the **Account** option.
5. Click **Change Password**.

6. Enter the old and new passwords.
7. Enter the new password again in the **Confirm Password** field.

The screenshot shows a dialog box titled "Change Your Password" with a close button (X) in the top right corner. It contains three input fields for passwords, each with a masked password (dots). The "Confirm Password" field is highlighted with a blue border. At the bottom right, there are two buttons: "Change Password" and "Cancel".

8. Click **Change Password** to finish.

9.3 Tank groups

Tanks can be organized in groups for a clear overview. You can easily add or remove tank groups whenever needed.

Related information

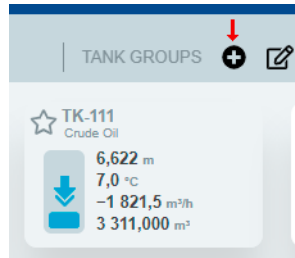

[Configure account](#)

9.3.1 Add a tank group

You can easily add tank groups if needed. This option allows you to organize tanks for a clear overview.

Procedure

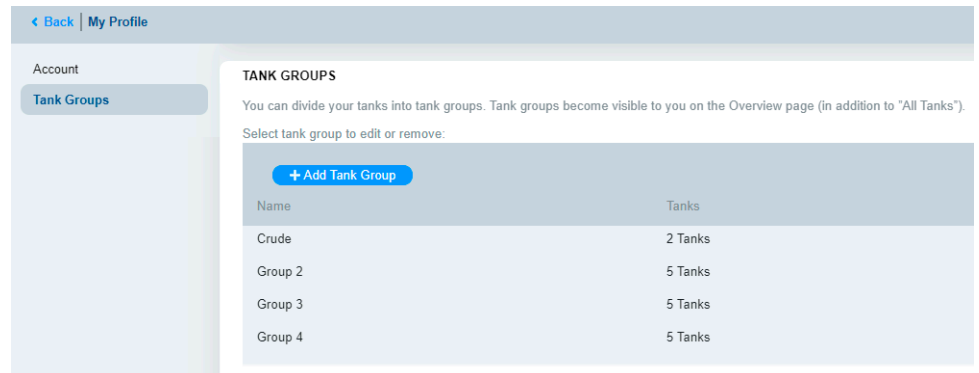

1. Select the **Add Tank Group** button.

A dialog appears that lets you create a new tank group with the desired tanks.

You may also add tank groups via **My Profile**:

- a) Open **My Profile**.
- b) Select **Tank Groups** in the left-hand menu.

- c) Click the **Add Tank Group** button to open a dialog for a new tank group.

2. Select **General**.

The screenshot shows the 'GENERAL' configuration page for a new tank group. The page has a dark blue header with the Emerson logo and navigation links for 'Overview', 'Movement' (64), and 'Watchlist' (2). Below the header is a breadcrumb trail: '< Back | (new) Tank Group'. On the left, there is a sidebar with two tabs: 'General' (selected) and 'Tanks'. The main content area is titled 'GENERAL' and contains two text input fields: 'Tank Group Name' and 'Description (Optional)'. Below these fields is a section titled 'TANKS' which is currently empty.

3. Enter a tank group name and a short description.

4. Select **Tanks**.

The screenshot shows the 'TANKS' configuration page for a new tank group. The page has the same dark blue header and breadcrumb trail as the previous screenshot. The sidebar now has the 'Tanks' tab selected. The main content area is titled 'TANKS' and contains the instruction 'Select tanks to make accessible to this tank group:'. Below this instruction are two links: 'Select All' and 'Clear All'. A table lists tanks with their names and products. The tanks TK-100 through TK-105 are selected with checkboxes, while TK-106 and TK-111 are not.

Name	Product
<input checked="" type="checkbox"/> TK-100	Crude Oil
<input checked="" type="checkbox"/> TK-101	Diesel fuel
<input checked="" type="checkbox"/> TK-102	Furnace oil
<input checked="" type="checkbox"/> TK-103	Crude Oil
<input checked="" type="checkbox"/> TK-104	Diesel fuel
<input checked="" type="checkbox"/> TK-105	Crude Oil
<input type="checkbox"/> TK-106	Diesel fuel
<input type="checkbox"/> TK-111	Crude Oil

5. Select the desired tanks to be included in the group. The tank group can be edited at a later occasion in case you like to add or remove tanks

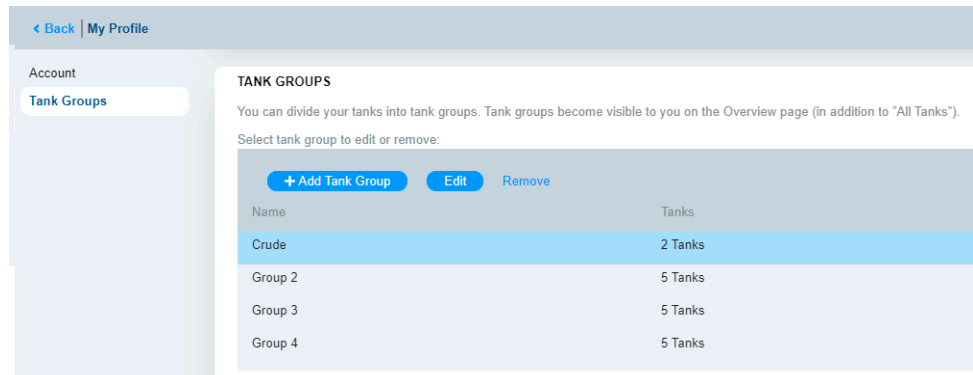

6. Click **Save** once you are finished.

9.3.2 Remove a tank group

You can easily remove tank groups whenever needed.

Procedure

1. Open **My Profile**.
2. In the left-hand menu, select **Tank Groups**.

3. Select the tank group to be removed.
The **Remove** option will appear.
4. Click **Remove** to delete the selected tank group.

11.1.1 Add and activate new license

This procedure describes how to add and activate a new Rosemount™ TankMaster™ Mobile license.

Prerequisites

Prior to managing your TankMaster Mobile license, you need to ensure that:

- TankMaster Mobile is installed and up and running
- Serial number and Product key are available. You will find them in the DVD box that was shipped with the TankMaster Mobile software package.
- A client computer is available to access the TankMaster Mobile web application.

Procedure

1. From the client computer, connect to the **TankMaster Mobile web application** and sign in.
2. Enter **Administration** mode.
3. Open the **Settings** menu.
4. Navigate to the **Licensing** page.
5. Click **Enter New Product Key**.

- In the dialog that appears, enter the **Product Key** and select **Save**.
You will find the **Product Key** in the DVD box that was shipped with the product.
Once the **Product Key** is entered, the **System Key** will automatically appear.

- Copy or make a note of the **System Key**.
- Navigate to TankMaster.Rosemount.com/ServiceCenter and sign in to your account or create a new account if you are a new user.

- Under **My Licenses** click **Add New License**.

SERIAL NO	SOFTWARE UPDATE SUBSCRIPTION END DATE	LICENSE STATUS	LICENSE INFORMATION	ACTIONS

11.1.2 Upgrade license with new options

This procedure describes how to upgrade a Rosemount™ TankMaster™ Mobile license with new options.

Prerequisites

Prior to managing your TankMaster Mobile license, you need to ensure that:

- TankMaster Mobile is up and running
- Serial number and Product key are available. You will find them in the DVD box that was shipped with the TankMaster Mobile software package.
- A client computer is available to access the TankMaster Mobile web application.

Procedure

1. Navigate to TankMaster.Rosemount.com/ServiceCenter and sign in to your account.
2. Open **My Licenses**.
3. Under **Actions**, select **Upgrade options**.
4. Select desired options for:
 - Features
 - Number of tanks
 - Concurrent users
5. Click **Continue**.
6. Verify ordering info.
7. Click **Create pdf** to create an order with new model code.
8. Send the order to Emerson.
A new Product key will be shipped as soon as the order is confirmed.
9. From the client computer, connect to the TankMaster Mobile web application and sign in.
10. Enter **Administration** mode.
11. Open the **Settings** menu.
12. Navigate to the **Licensing** page.
13. Click **Enter New Product Key**.
14. Enter the **Product Key**. The new **Product Key** for the upgraded license is sent out via email. It can also be found on TankMaster.Rosemount.com/ServiceCenter. Note that you may find two or more keys with different dates in case previous license updates have been performed. Then the updated license can be identified by date.
Once the Product key is entered, the **System Key** will automatically appear.
15. Copy or make a note of the **System Key**.
16. Navigate to TankMaster.Rosemount.com/ServiceCenter and sign in to your account.
17. Under **My Licenses** click **Re-activate**.
18. Enter the new **System Key** that was shown on the TM Mobile **Licensing** page.
19. Click **Activate License**.
20. Select option **Download activation key** or **Email activation key**.
In case you select the email option, note that the Activation Key is attached to the email and needs to be downloaded.

21. Return to the TankMaster Mobile web application.
22. Navigate to the **Licensing** page.
23. Click **Activate License**.
24. Browse to the folder where the **Activation key** file is stored, select the key, and click **Open**.
A message appears saying that the TankMaster Mobile license was activated.
25. Click **Confirm**.
The TankMaster Mobile license options are shown in the **License Information** pane.
26. Check that license options are correct according to model code.

11.1.3 Transfer license to a new server

This procedure describes how to move a Rosemount™ TankMaster™ Mobile license to a new server.

Prerequisites

Prior to managing your TankMaster Mobile license, you need to ensure that:

- TankMaster Mobile is up and running
- Serial number and Product key are available. You will find them in the DVD box that was shipped with the TankMaster Mobile software package. Also available on TankMaster.Rosemount.com/ServiceCenter.
- A client computer is available to access the TankMaster Mobile web application.

Figure 11-1: Licence transfer procedure in brief

Procedure

1. Start by installing **Rosemount TankMaster Mobile** on the **new TankMaster Mobile server**.
2. From the client computer, connect to the **new TankMaster Mobile server** and sign in.
3. Enter **Administration** mode.
4. Open the **Settings** menu.
5. Navigate to the **Licensing** page.
6. Click **Enter New Product Key**.
Use the **Product Key** from the **old TankMaster Mobile server** installation.
A **System Key** for the new server is generated.
7. Copy or make a note of the **System Key**.
8. From the client computer, connect to the **old TankMaster Mobile server** and sign in.
9. Enter **Administration mode**.
10. Open the **Settings** menu.
11. Navigate to the **Licensing** page.

12. Click **Transfer license to a different server**.
A dialog appears with information on license transfer.
13. Click **Transfer**.
A **Transfer Key** is generated.

Note

Generating a **Transfer Key** will disable the license on the current server.

14. Copy the **Transfer** key.
15. Navigate to TankMaster.Rosemount.com/ServiceCenter and sign in to your account.
16. Select **My licenses** → **Actions** → **Transfer**.
17. Enter the **Transfer Key** and click the **Transfer License** button.
The **Activate License** dialog appears which verifies that the license was transferred.
18. Enter the **System Key** that was generated on the **Licensing** page for the **new TankMaster Mobile server**.
19. Click **Activate License**.
20. Select one of the options **Download Activation Key** or **Email Activation Key**.
In case you select the email option, note that the Activation Key is attached to the email and needs to be downloaded.
21. Return to the web application for the **new TankMaster Mobile server**.
22. Navigate to the **Licensing** page.
23. Click **Activate License**.
24. Browse to the folder where the **Activation key** file is stored, select the key, and click **Open**.
A message appears saying that the TankMaster Mobile license was activated.
25. Click **Confirm**.
The TankMaster Mobile license options are shown in the **License Information** pane.
26. Check that license options are correct according to model code.

11.1.4 Update license subscription/software update period

This procedure describes how to update a Rosemount™ TankMaster™ Mobile license subscription.

Procedure

1. Navigate to TankMaster.Rosemount.com/ServiceCenter and sign in to your account.
2. Open **My Licenses**.
3. Under **Actions**, select **Renew software update period**.
4. From the drop-down list, select the desired software update period: 1 year, 3 year, or 5 years.

In case the current software update period is still valid, then the new period will be added after the current period expires.

Note

By renewing the update period you will get access to new software versions. The current version will still work regardless if the update period is renewed or not

5. Click **Continue**.
6. Verify that Serial number is correct.
7. Click **Create pdf** to create an order for the new software update period.
The pdf file will include the license serial number and an item number.
8. Send the order to your local sales representative.
Your software update period extension will be confirmed via email.
