

# MyWorkspace

## Increase Efficiency with Engineering Tools

A component of the MyEmerson personalized digital experience, **MyWorkspace** allows you to confidently design solutions in a collaborative environment – where you can easily share with colleagues or Emerson experts to maximize efficiency.

### Features

- Create application sizing, configurations, CAD drawings and diagrams or generate the proper documentation all in one place.
- Easily implement new solutions to increase productivity
- MyWorkspace makes collaboration easy!
- MyWorkspace makes re-ordering easy!

### Benefits

- With all the tools you need in one location, you're able to create design solutions quickly and confidently in a single, centralized location. The ability to collaborate with colleagues allows you to easily implement new solutions for your business.
- With MyWorkspace, the online engineering tools streamline sizing and configuration tasks with visual configurators and advisors to guide you through the specification process. You're able to generate more accurate solutions for your application – up to 93% faster than using conventional methods.
- When your solution is ready, share it seamlessly with your procurement team so they can generate quotes, manage lead times and execute purchase orders.
- With MyWorkspace you can save commonly ordered items into a list that is shareable with your colleagues to ensure that standards are followed and speed up the process. You can add unique identifiers to each line to make finding items easy.
