

Pelton Governor Support

Our Commitment

If you have Pelton governors and are wondering about continuing support, look no further than Emerson. We have provided support to many hydro utility customers in the form of technical guidance, field service, factory repairs, and both factory and on-site training classes. We have an extensive inventory of reconditioned parts on hand and are expanding our line of new replacement parts for various types of Pelton governors, including the Model B cabinet actuator. We can also reverse engineer any governor part from any governor manufacturer. We'll do what it takes to keep your units running efficiently and reliably for years to come.

Emerson is committed to supporting all your governors, regardless of manufacturer or model, with parts, field service, technical support, training and engineering for as long as you wish to keep them in service. These kits may also be applicable to other pump systems. Please consult your Emerson regional office for assistance.
