

Deployment Services for AMS Optics

Deploy AMS Optics quickly for the fastest return on investment:

- Ensure all software and servers are installed and communicating
- Assign roles/responsibilities for relevant KPIs and alerts
- Establish communications via mobile app for 24/7 visibility
- Provide basic training for key stakeholders of the system

Emerson-certified experts will plan and execute the AMS Optics installation at your facility.

Introduction

AMS Optics aggregates the silos of data related to your production asset to provide an asset-centric view of the health of your equipment. This could involve a network of servers and software programs, with detailed attention to the cyber security of your plant. With installation and configuration services, you can quickly make use of the technology investment without distracting plant personnel from their daily responsibilities. Emerson experts can help you get started quickly, ensure the asset management system is set up effectively to achieve your goals, customize the installation to your internal organization so that alerts received are relevant to the recipient role.

Benefits

Ensure all software and servers are installed and communicating: Deployment Services for AMS Optics enable and ensure value from your technology investment. Save time and ensure success by having experienced Emerson-certified personnel install servers and software applications – including AMS brand diagnostics tools as necessary. Install Services provides basic training for the primary users of AMS Optics so the system is immediately effective.

Assign roles/responsibilities for relevant KPIs and alerts: Using the Asset Explorer utility, Deployment Services will identify and assign assets in the plant to the roles specific to your organization. As a result, Asset Viewer will provide members of your team with the insight they require to make timely and intelligent decisions.

Establish communications via mobile app for 24/7 visibility:

Deployment services will establish and test connectivity of the AMS Optics Mobile App Services ensure your team is receiving relevant information and able to collaborate with other team members.

Service Description

Whether you’re installing a complete system for the first time or upgrading from your existing AMS installation to AMS Optics, Deployment Services are designed to provide an interactive introduction to the AMS Optics experience. An Emerson certified specialist will configure all software and servers by executing the following tasks:

- Establishing a pre-installation check list customized to your site(s).
- Schedule and conduct a kickoff meeting with appropriate stakeholders to review and confirm the planned services.

- Confirm the requirements are in place for the server and network architecture.
- Perform the SQL database setup.
- Load AMS Optics onto the main computer.
- Install ASI interfaces as required.
- Configure communication between software and ASI connections.
- Import list/data on assets being monitored.
- Set up AMS Optics Mobile App.
- Confirm system behaviors by allowing the system to run over night, reviewing messages, and ensuring receipt of data.
- Review basic functionality and navigation with the site team.
- Document the configuration and establish backup of system.
