

Book your MTM System Crew Course

Take this opportunity to learn more about your MTM system.

These courses are generally intended for Officers, Engineers, Cargo Operators and other crew who need to know the operation, configuration, maintenance, troubleshooting and replacement of devices. Courses include both operational and theoretical training and vary from basic to advanced depending on required training level.

In order to take full advantage of the advanced features in the system we recommend our crew course, both to raise the general level of understanding and to gain specific knowledge.

The participants who complete the course will contribute to a safer and more effective all-tanks operation and service. This will maximize the uptime, cut down on service visits and enhance ship safety.

The teachers are our experienced Service Engineers.

We offer customized training courses – see list below for content example.

- MTM system overview
- Damcos Valve Remote Control & Actuators
- Rosemount TankRadar
- LevelDatic
- MAS2600
- Display & Workstation
- Operation
- Service & Maintenance
- Troubleshooting
- Safety, IS
- Hands-on-exercises

The training courses could take place at Emerson's Marine Tank Management location in Ry or Naestved, Denmark, Singapore and in Gothenburg, Sweden. To meet your specific requirements we develop customized courses, even onboard the vessel or at the yard.

We customize the training for Ship Management, Superintendents, Yard engineers or other groups.

Expertise in Marine Tank Management

Emerson's Marine Tank Management division is part of Emerson Process Management. Our expertise covers integrated tank management systems, valve remote control, cargo tank gauging, ballast, fuel oil and service tank monitoring and draft measurement for all types of ships and offshore units.

Our brands – Damcos, LevelDatic, MAS2600, Rosemount TankRadar – have served marine customers for more than 30 years and together represent the foremost thinking within marine tank management. What really sets us apart is our dedication to the marine sector and engineering excellence. This is reflected in all aspects of our offering, from design and production, through to all application know-how and global aftersales support.
